PRODUCT WARRANTY INFORMATION

SCUBAPRO PRODUCT	WARRANTY PERIOD
REGULATORS	
1 st Stages, 2 nd Stages, Systems, and Air2s	Limited Lifetime*
All Included Hoses and Mouthpieces	One Year
BUOYANCY COMPENSATORS	
Seams	Limited Lifetime*
Jacket (Not Including Seams)	Two Years
X-Tek Wings	Two Years
All Included Hoses, Weight Pockets, and Balanced Power Inflators	One Year
COMPUTERS/INSTRUMENTS	
Computers and Transmitters	Two Years
Instruments	One Year
All Included Hoses, Consoles, Instruments, and Gauges	One Year
FINS	
Seawing Nova, Seawing Nova Full Foot	Limited Lifetime
Twin Jet Max, Twin Jet Adjustable, and Jet	Limited Lifetime
All Other Fins	One Year
DRYSUITS	
Drysuits	Two Years
Undergarmets	One Year
LIGHTS	
Lights	Two Years
OTHER	
Masks, Snorkels, Cruiser Vest, Currents Vest, Wetsuits, Boots, Gloves, Hoods, Shorts, Rash Guards, Knives, Weight Belts, Bags, and all other items not listed above	One Year

The above summary does not constitute an offer of warranty.
 *See Warranty Literature accompanying the product for Conditions, or see the Limited Warranty below for products with a one year Warranty Period.

SCUBAPRO warrants to the original, registered consumer purchaser that, for the period of one year from date of purchase, each SCUBAPRO product component not otherwise warranted, and each SCUBAPRO replacement part, purchased from an authorized SCUBAPRO dealer will be free from defects in materials and workmanship under normal use and with reasonable maintenance. This warranty does not apply to any product or part used commercially. A list of authorized SCUBAPRO dealers can be obtained by calling 1-800-GO-SCUBA or at www.scubapro.com.

SCUBAPRO will, at its option, repair or replace without charge any warranted component or replacement part that is defective in materials or workmanship. Repair or replacement is SCUBAPRO's only responsibility and your only remedy under this warranty.

To obtain warranty service, you must deliver the affected component or part, together with your proof of purchase to any authorized SCUBAPRO dealer.

This warranty does not cover damage resulting from improper usage, improper maintenance, neglect of care or maintenance or repair service performed by someone other than an authorized SCUBAPRO dealer.

ALL IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS WRITTEN WARRANTY. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

SCUBAPRO SHALL NOT BE LIABLE FOR LOSS OF USE OR ANY OTHER INCIDENTAL, CONSEQUENTIAL, OR INDIRECT COSTS, EXPENSES OR DAMAGES. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusions may not apply to you.

No salesperson, dealer or representative is authorized to make any modifications to this warranty or to make additional warranties on behalf of SCUBAPRO.

This warranty gives you specific legal rights, and you may also have other rights that may vary from state to state.

MK25 EVO/A700 CARBON BLACK TECH

SCUBAPRO's flagship reg system, featuring a tough hand-made carbon fiber cover on the A700's full-metal casing, plus a unique DLC Black Tech protective coating on both first and second stages. Offering superb breathing performance, excellent impact resistance and dependable protection against the ravages of salt water and corrosion, this race-car-sleek system looks as good as it works.

First Stage

- Air balanced flow-through piston in a Black Tech-coated brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Patent pending XTIS (Extended thermal Insulating system) fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue.
- New spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Five high-flow low pressure ports on a swivel turret maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in either a 3364psi/232bar INT or 4350psi/300bar DIN configurations.
- DIN version comes with a new dual-compound wheel that features a new ergo shape and soft grip on a rugged black nylon frame.
- Weight: INT 232 (oz/g): 27.9/790; DIN 300 (oz/g): 20.1/572.
- Airflow at 2900psi/200bar: (l/min/SCFM): >8500/301.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Hand-made carbon fiber front cover and rugged metal case and valve housing are able to withstand years of aggressive diving.
- Metal case construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity.
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 8.2oz/233g.
- Airflow at 2900psi/200bar: 2000 l/min - 71 SCFM.
- Maximum low pressure: 203psi/14bar.

MK25 EVO/A700

SCUBAPRO's flagship reg system is designed for divers who want the best. The MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The A700 offers effortless inhalation and an ease of exhalation that is unmatched in a precision-handcrafted, full-metal package. Together they provide unparalleled breathing performance in all water temperatures.

First Stage

- Air balanced flow-through piston in a chrome-plated brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Patent pending XTIS (Extended thermal Insulating system) fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue.
- New spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Five high-flow low pressure ports on a swivel turret maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 (oz/g): 27.9/790.
- Airflow at 2900psi/200bar: (l/min/SCFM): >8500/301.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged full-metal case, front cover and valve housing are able to withstand years of aggressive diving.
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity.
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouth-piece is easy to grip yet doesn't inhibit airflow.
- Weight: 9.3oz/265g.
- Airflow at 2900psi/200bar: 2000 l/min - 71 SCFM.
- Maximum low pressure: 203psi/14bar.

MK25 EVO/S600 TITANIUM

SCUBAPRO's top regulator technology is on display in this ultra-light, corrosion-resistant reg system. The MK25 EVO T is machined from a solid block of titanium which will not corrode, even in concentrated saltwater conditions, promising a century of trouble-free use. It offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The S600 T second stage uses titanium inside and out for the ultimate in lightweight performance

First Stage

- Air-balanced flow-through piston in a full titanium body provides effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Patent pending XTIS (Extended thermal Insulating system) fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue.
- New spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Five high-flow low pressure ports on a swivel turret maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 (oz/g): 16.9/480.
- Airflow at 2900psi/200bar: (l/min/SCFM): >8500/301.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Titanium inserts, trim ring and plate, and a full titanium interior barrel, make this regulator super lightweight and resistant to corrosion.
- Metal valve housing is able to withstand years of aggressive diving.
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch.
- Super-flow hose features an oversized bore (larger inside hose diameter) that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 5.5oz/156g.
- Airflow at 2900psi/200bar: 1850 l/min - 66 SCFM.
- Maximum low pressure: 203psi/14bar.

MK25 EVO/S600

DEEP BLUE TITANIUM CORE

The high performance MK25 EVO/S600 is known for its low work of breathing and tremendous reserve capacity. Add a durable jewel-colored Deep Blue PVD (Physical Vapor Deposition) finish on both first and second stages and you have a reg system with a protective coating that provides superior scratch and corrosion resistance. In the most demanding dive conditions, this reg performs flawlessly, and looks great doing it.

First Stage

- Air balanced flow-through piston in a PVD-coated brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Patent pending XTIS (Extended thermal Insulating system) fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue.
- New spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Five high-flow low pressure ports on a swivel turret maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 (oz/g): 27.9/790.
- Airflow at 2900psi/200bar: (l/min/SCFM): >8500/301.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Precision molded carbon fiber and technopolymer housing is lightweight and offers cold-water and corrosion resistance for long life.
- A full titanium interior barrel makes second stage super lightweight and resistant to corrosion.
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch.
- Super-flow hose features an oversized bore (larger inside hose diameter) that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 6.8oz/193g; Titanium version: 5.5oz/156g
- Airflow at 2900psi/200bar: 1850 l/min - 66 SCFM.
- Maximum low pressure: 203psi/14bar.
- Changeable purge covers allow you to make your regulator truly unique.

MK25 EVO/S600

Combining SCUBAPRO's best-selling second stage and its top-performing first stage is a match made in diver heaven. The MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The S600, with its rugged fiberglass casing and stainless steel front face and ring, provides a steady, effortless flow of air, regardless of depth. In all water temperatures, in the most demanding dive conditions, this reg system performs flawlessly.

First Stage

- Air balanced flow-through piston in a chrome-plated brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Patent pending XTIS (Extended thermal Insulating system) fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue.
- New spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Five high-flow low pressure ports on a swivel turret maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 (oz/g): 27.9/790.
- Airflow at 2900psi/200bar: (l/min/SCFM): >8500/301.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Metal valve housing is able to withstand years of aggressive diving.
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 6.8oz/193g.
- Airflow at 2900psi/200bar: 1850 l/min - 66 SCFM.
- Maximum low pressure: 203psi/14bar.
- Changeable purge covers allow you to make your regulator truly unique.

MK25 EVO/G260 BLACK TECH

A reg system aimed at technical divers, the MK25 EVO offers excellent resistance to freezing, superb inhalation sensitivity and instant delivery of air on demand. The G260's casing is built from rugged nylon fiberglass and uses freeze resistant components. Both first and second stages have a Black Tech scratch-resistant coating that protects against the ravages of salt water and corrosion. This durable coating includes an inner layer of chemical Nickel (FDA approved) and an outer glossy DLC (Diamond Like Carbon) finish. It's a rugged reg system that delivers solid breathing performance in all diving conditions and water temperatures.

- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Nylon fiberglass design features SCUBAPRO's biggest second stage casing and diaphragm for the ultimate in breathing sensitivity, regardless of position in the water.
- Dark anodized aluminum front cover ring adds scratch resistance without adding weight.
- Metal components, including metal air barrel and metal valve inlet tube, increase resistance to freezing when diving in extreme conditions.
- High-flow exhaust valve reduces exhalation for better overall breathing comfort.
- A diver-adjustable inhalation effort knob fine-tunes air delivery to suit changing depths, water conditions and personal tastes.
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch prevents free flows in cold water or when used as an octopus.
- Reversible hose attachment allows you to easily adjust hose routing for tech diving configurations.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 9.7oz/275g.
- Airflow at 2900psi/200bar: 1800 l/min - 64 SCFM.
- Maximum low pressure: 203psi/14bar.

MK25 EVO/G260

Offering effortless air delivery and outstanding reliability, this is the go-to air delivery system for cold water or technical diving. There's no better example of solid first stage performance in all water temperatures than the MK25 EVO. Teamed with the venerable G260, this system can be relied upon to deliver top-of-the-line performance in the most extreme conditions.

First Stage

- Air balanced flow-through piston in a chrome-plated brass body provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Patent pending XTIS (Extended thermal Insulating system) fully insulates the inner mechanism from the environment, improving cold-water resistance by 30% and delaying ice formation in extreme cold-water conditions without compromising breathing performance. Key insulation system components are visible in blue.
- New spring insulating coating, body insulating bushing, anti-freeze cap, bigger body and cap thread all work in concert with the XTIS to improve cold-water performance.
- Anti-freeze protection radically increases breathing reliability when diving in the most extreme water temperatures.
- Two opposing high pressure ports allow the first stage to be positioned either up or down.
- Five high-flow low pressure ports on a swivel turret maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 (oz/g): 27.9/790.
- Airflow at 2900psi/200bar: (l/min/SCFM): >8500/301.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Nylon fiberglass design features SCUBAPRO's biggest second stage casing and diaphragm for the ultimate in breathing sensitivity, regardless of position in the water.
- Dark anodized aluminum front cover ring adds resistance without adding weight.
- Metal components, including metal air barrel and metal valve inlet tube, increase resistance to freezing when diving in extreme conditions.
- High-flow exhaust valve reduces exhalation for better overall breathing comfort.
- A diver-adjustable inhalation effort knob fine-tunes air delivery to suit changing depths, water conditions and personal tastes.
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch prevents free flows in cold water or when used as an octopus.
- Reversible hose attachment allows you to easily adjust hose routing for tech diving configurations.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.

MK21/G260

A compact piston first stage teamed with a full-featured rugged nylon fiberglass second stage with freeze resistant components equals an easy-breathing reg system with power to spare. It's a proven performer for all types of diving, but where the MK21/G260 really excels is in cold-water diving scenarios and technical applications.

First Stage

- Air-balanced flow-through piston provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Polished chrome-plated marine grade brass body is close to 20% smaller than the MK25, making it an easy travel companion.
- Unique thermal exchange design with external fins optimizes freezing resistance.
- Two high pressure ports, one on each side of the body, allow the first stage to be positioned either up or down.
- Standard "smart" hose routing cap offers four low pressure ports angled for more convenient hose routing (+/- 20°).
- Optional hose routing cap increases routing configurations with four angled low pressure ports (0°/30°) plus a fifth centralized high-flow low pressure port, ideal for technical diving.
- Redesigned yoke allows for easier mounting on a cylinder, and a redesigned cap protects internal components from water intrusion after the dive.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 (oz/g): 26.2/744.
- Airflow at 2900psi/200bar: (l/min/SCFM): >7500/265.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Nylon fiberglass design features SCUBAPRO's largest second stage casing and diaphragm for the ultimate in breathing sensitivity, regardless of position in the water.
- Anodized aluminum front cover ring adds resistance without adding weight.
- Metal air barrel and increases resistance to freezing when diving in extreme conditions.
- High-flow exhaust valve reduces exhalation for better overall breathing comfort.
- A diver-adjustable inhalation effort knob fine-tunes air delivery to suit changing depths, water conditions and personal tastes.
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch prevents free flows in cold water or when used as an octopus.
- Reversible hose attachment allows you to easily adjust hose routing for tech diving configurations.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 9.7oz/275g.
- Airflow at 2900psi/200bar: 1800 l/min - 64 SCFM.
- Maximum low pressure: 203psi/14bar.

MK21/S560

This reg system is full of features, offers SCUBAPRO reliability and is priced right. About 20 percent smaller than SCUBAPRO's flagship MK25 but benefitting from the same core technology, the MK21 features a modern, cutting-edge-design whose size and weight make it an excellent choice for travel divers. The full-featured S560 second stage, built with a rugged nylon fiberglass case, is lightweight too, and also easy to use. Together they create the must-have reg system for recreational divers of all skill levels.

First Stage

- Air-balanced flow-through piston provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Polished chrome-plated marine grade brass body is close to 20% smaller than the MK25, making it an easy travel companion.
- Unique thermal exchange design with external fins optimizes freezing resistance.
- Two high pressure ports, one on each side of the body, allow the first stage to be positioned either up or down.
- Standard "smart" hose routing cap offers four low pressure ports angled for more convenient hose routing (+/- 20°).
- Optional hose routing cap increases routing configurations with four angled low pressure ports (0°/30°) plus a fifth centralized high-flow low pressure port, ideal for technical diving.
- Redesigned yoke allows for easier mounting on a cylinder, and a redesigned cap protects internal components from water intrusion after the dive.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 (oz/g): 26.2/744.
- Airflow at 2900psi/200bar: (l/min/SCFM): >7500/265.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Lightweight techno-polymer casing helps reduce jaw fatigue and improve diving comfort.
- Techno Polymer inlet tube contributes to reliability and long life.
- High flow exhaust valve reduces exhalation effort to lower overall work of breathing.
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 6.1oz/172g.
- Airflow at 2900psi/200bar: 1850 l/min - 66 SCFM.
- Maximum low pressure: 203psi/14bar.

MK21/C350

SCUBAPRO's compact piston first stage has been teamed up with a compact, high performance second stage. The MK21 is about 20 percent smaller than SCUBAPRO's flagship MK25 but benefits from the same core technology. The C350 is the most compact second stage in SCUBAPRO's line. It is lightweight, breathes easy, offers full user controls, and delivers effortless airflow. It's the perfect combination for divers looking for high performance in a travel-friendly system.

First Stage

- Air-balanced flow-through piston provides constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Polished chrome-plated marine grade brass body is close to 20% smaller than the MK25, making it an easy travel companion.
- Unique thermal exchange design with external fins optimizes freezing resistance.
- Two high pressure ports, one on each side of the body, allow the first stage to be positioned either up or down.
- Standard "smart" hose routing cap offers four low pressure ports angled for more convenient hose routing (+/- 20°).
- Optional hose routing cap increases routing configurations with four angled low pressure ports (0°/30°) plus a fifth centralized high-flow low pressure port, ideal for technical diving.
- Redesigned yoke allows for easier mounting on a cylinder, and redesigned cap protects internal components from water intrusion after the dive.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 (oz/g): 26.2/744.
- Airflow at 2900psi/200bar: (l/min/SCFM): >7500/265.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Compact body and exhaust tee take up little space in a travel dive bag.
- Stainless steel frame on the front cover adds some style.
- Optimal flow design incorporates a special barrel and poppet valve to produce maximum airflow under any diving conditions.
- User controls include a diver-adjustable inhalation effort knob and Venturi-Initiated Vacuum Assist (VIVA).
- Large purge button is easy to activate, even wearing thick gloves.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouth-piece is easy to grip yet doesn't inhibit airflow.

MK17 EVO/A700

Built to deliver a steady supply of air in harsh diving conditions, when the going gets rough, the MK17 EVO/A700 gets going. The new MK17 EVO is completely sealed off from the elements, ensuring trouble-free operation no matter how cold or murky the water gets. It is more compact yet delivers better breathing performance than its predecessor. Its improved internal design allows more airflow from the LP ports which have been reconfigured for better hose routing. The A700 offers extraordinary breathing performance, including effortless inhalation and an ease of exhalation that is unmatched, all in a precision-handcrafted, full-metal package.

First Stage

- Air balanced diaphragm delivers constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Dry ambient pressure chamber increases freezing resistance, ensuring consistent airflow in the coldest conditions.
- Two high pressure and four high-flow ports maximize air delivery and hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 - 30oz/850g.
- Airflow at 2900psi/200bar: 6900 l/min - 230 SCFM.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Rugged full metal case, front cover and valve housing are able to withstand years of aggressive diving.
- Metal construction enables the use of a larger diaphragm inside a compact casing, increasing breathing sensitivity.
- User controls include a diver-adjustable inhalation effort knob and coaxial-flow Venturi-Initiated Vacuum Assist (VIVA) lever.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 9.3oz/265g.
- Airflow at 2900psi/200bar: 2000 l/min - 71 SCFM.
- Maximum low pressure: 203psi/14bar.

MK17 EVO/G260

The MK17 EVO/G260 is ideally suited to technical as well as cave diving. The new MK17 EVO is completely sealed off from the elements, ensuring trouble-free operation no matter how cold or murky the water gets. It is more compact yet delivers better breathing performance than its predecessor. Its improved internal design allows more airflow from the LP ports which have been reconfigured for better hose routing. Teamed with the venerable G260, this system can be relied upon to deliver top-of-the-line performance in the most extreme conditions..

First Stage

- Air balanced diaphragm delivers constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Environmentally sealed system prevents water and pollutants from fouling the inner mechanism.
- Dry ambient pressure chamber increases freezing resistance, ensuring consistent airflow in the coldest conditions.
- Two high pressure and four high-flow ports maximize air delivery and hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 - 30oz/850g.
- Airflow at 2900psi/200bar: 6900 l/min - 230 SCFM.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort at varying depths and supply pressures.
- Nylon fiberglass design features SCUBAPRO's largest second stage casing and diaphragm for the ultimate in breathing sensitivity, regardless of position in the water.
- Anodized aluminum front cover ring adds resistance without adding weight.
- Metal components, including metal air barrel and metal valve inlet tube, increase resistance to freezing when diving in extreme conditions.
- High-flow exhaust valve reduces exhalation for better overall breathing comfort.
- A diver-adjustable inhalation effort knob fine-tunes air delivery to suit changing depths, water conditions and personal tastes.
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch prevents free flows in cold water or when used as an octopus.
- Reversible hose attachment allows you to easily adjust hose routing for tech diving configurations.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 9.7oz/275g.
- Airflow at 2900psi/200bar: 1800 l/min - 64 SCFM.
- Maximum low pressure: 203psi/14bar.

MK11/S360

Designed for divers seeking reliable performance in an uncomplicated air delivery system, the MK11/S360 is compact, user-friendly and affordable. The balanced diaphragm MK11, with its chrome-plated brass body specially designed to reduce size and weight, is an ideal travel companion. Its system features internal parts that are sealed from the elements. The S360 breathes smooth and easy and includes a preset inhalation effort and a single user control. Delivering consistent airflow, ease of use and dependability, this reg system is just the ticket for recreational divers in general, and dive travelers in particular.

Part Number	Description
12.196.000	INT 232

PRICES	
MSRP	424.00

First Stage

- Air balanced diaphragm design delivers constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Marine brass body has internal parts that are sealed to prevent water and pollutants from fouling the inner mechanism while enhancing cold-water performance.
- Two high pressure, two low pressure and two high-flow ports maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 - 24.4oz/692g.
- Airflow at 2900psi/200bar: 5500 l/min - 195 SCFM.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Air-balanced valve smoothes out the inhalation effort when diving at varying depths and supply pressures.
- Lightweight techno-polymer casing helps reduce jaw fatigue and improve diving comfort.
- Techno Polymer valve inlet tube contributes to reliability and long life.
- High flow exhaust valve reduces exhalation effort to lower overall work of breathing.
- Venturi-Initiated Vacuum Assist (VIVA) dive/pre-dive switch helps control free flows.
- Super-flow hose features an oversized bore that allows more air to flow on each inhalation.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Weight: 5.6oz/158g.
- Airflow at 2900psi/200bar: 1850 l/min - 66 SCFM.
- Maximum low pressure: 203psi/14bar.

MK11/R195

For divers looking for a regulator that's both simple and reliable, the MK11/R195 can't be beat. The compact MK11 has internal parts that are sealed from the elements, and the smooth breathing R195 features a large diaphragm, functional purge and a VIVA control. This reg system travels well, is easy to use and moves air efficiently. It's an exceptional all-around air delivery system for diving temperate to tropical waters.

First Stage

- Air balanced diaphragm design delivers constant and effortless airflow unaffected by depth, tank pressure, or breathing rate.
- Marine brass body has internal parts that are sealed to prevent water and pollutants from fouling the inner mechanism while enhancing cold-water performance.
- Two high pressure, two low pressure and two high-flow ports maximize hose routing options.
- External intermediate pressure adjustment enables technicians to fine-tune performance quickly and easily.
- Available in a 3364psi/232bar INT configuration.
- Weight: INT 232 - 24.4oz/692g.
- Airflow at 2900psi/200bar: 5500 l/min - 195 SCFM.
- Intermediate pressure (psi/bar): 130-142/9.0-9.8.

Second Stage

- Classic downstream valve comes with a VIVA switch to control free flows.
- Metal valve housing is built rugged and increases overall reliability.
- Super-flow hose features larger inner diameter to increase airflow.
- Reversible hose attachment makes it easy to use for side mount, pony or deco tanks.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Octo version includes yellow front cover and 39" high-viz yellow hose.
- Weight: 7.0oz/198g.
- Airflow at 2900psi/200bar: 1400 l/min - 50 SCFM.
- Maximum low pressure: 203psi/14bar.

MSRP	383.00

MK2 EVO/R195

It's the perfect go-anywhere reg for divers who like to keep their diving simple and affordable. The MK2 EVO is the only downstream piston-style first stage with internal components specifically designed to resist freezing in extreme cold-water conditions. When teamed with the R195, this reg system is reliable, easy to maintain, easy to use, and with its left or right hose routing capability, it's also the perfect system for use on stage or pony bottles.

First Stage

- Classic downstream piston design features a chrome-plated brass body with one high pressure and four low pressure ports.
- Patent pending XTIS (Extended Thermal Insulating System) fully isolates the mechanical elements from the cold, increasing freezing resistance by an average of 50% over its predecessor without compromising breathing performance.
- Additional internal technical improvements include a spring insulating bushing and coating, an insulating piston bushing, an insulating sleeve and an antifreeze cap, all of which contribute to freezing resistance. (Key insulation system components are visible in blue.)
- Chrome-plated brass body is 3.5mm smaller than its predecessor but houses an oversized piston by 1.6mm that provides better breathing performance by increasing airflow by 15%.
- Stainless steel removable orifice allows for easier maintenance while extending regulator life.
- Available in a 3364psi/232bar INT configuration.
- Meets new EN250-2014 standards for cold-water breathing performance.
- Weight: INT 232 - 24.9oz/706g.
- Airflow at 2900psi/200bar: 3000 l/min - 106 SCFM.
- Intermediate pressure (psi/bar): 123-142/8.5-9.8.

Second Stage

- Classic downstream valve comes with a VIVA switch to control free flows.
- Metal valve housing is built rugged and increases overall reliability.
- Super-flow hose features larger inner diameter to increase airflow.
- Reversible hose attachment makes it easy to use for side mount, pony or deco tanks.
- Ultra-comfortable orthodontic mouthpiece is easy to grip yet doesn't inhibit airflow.
- Octo version includes yellow front cover and 39" high-viz yellow hose.
- Weight: 7.0oz/198g.
- Airflow at 2900psi/200bar: 1400 l/min - 50 SCFM.
- Maximum low pressure: 203psi/14bar.

For information regarding this regulator system, refer to the Rental section

AIR2 5th GEN

This excellent BC inflator/reg is in its 5th generation with dramatically improved work of breathing. Sleek ergonomic inflate/deflate controls allow for pinpoint buoyancy control.

- Test-proven breathing performance and cracking effort surpass many traditional downstream second stages when it comes to ease of breathing.
- New dive/pre-dive switch lets you detune the unit when not in use, eliminating free flows.
- Flexible purge cover is easy to locate and depress for quick clearing.
- Power inflate and deflate buttons are positioned on top of the housing for easy buoyancy control.
- Power inflate button features a lighter lever for easy inflation.
- Power inflate and deflate buttons can be differentiated by color and touch due to their different shapes and sizes, improving ascent control and safety when inflating or deflating the BC.
- CE certified EN250A (>10°C/50°F warm water test controls) as a second stage regulator.

M2

The M2 is a dive computer like no other. Designed with SCUBAPRO's Human Factor Diving™ approach to product design, the M2 offers everything you expect from the leader in diving equipment. It is loaded with topside features and underwater functions, including air integration and electronic navigation, and most importantly, incorporates cutting-edge biometrics that enable you to live your life in dive mode.

- Human Factor Diving™ is SCUBAPRO's revolutionary new approach to product development that combines Human Factors Engineering, biometrics and wearable technology to create cutting-edge high-tech self-tracking devices that make diving safer and more fun.
- Targeted to recreational and technical divers as well as CCR divers and freedivers.
- Predictive Multi-Gas ZHL8 ADT MB algorithm accommodates three gas mixes (21-100% O2).
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Smart technology wireless air integration handles multiple transmitters.
- Heart rate monitor records heartbeat and skin temperature (with SCUBAPRO HRM Belt only) that can be factored into the decompression calculation along with workload.
- Digital tilt-compensated on-board compass allows for easy navigation.
- Casing is built from the highest marine grade 316L stainless steel with a two-toned brushed finish that protects and looks great.

- Control buttons are assembled in modules using triple O-rings to maintain the casing's watertight integrity.
 - Great for freediving.
- PLUS:**
- Programs three gas mixes (21-100% O2).
 - Four Dive modes-Scuba, Gauge, Freediving and CCR.
 - Swim mode.
 - Sport mode.
 - Full topside time-keeping functions.
 - Chronograph with lap memory for running.
 - Fixed PPO2 CCR algorithm.
 - Visually pleasing segmented LCD display.
 - Protective mineral glass.
 - Easy-to-read characters and graphics.
 - Intuitive menu.
 - Simple circular navigation system.
 - Enhanced logbook for freediving.
 - Maximum operating depth: 394ft/120m.
 - CR2450 user replaceable battery rated two years/300 dives.
 - PC and Mac compatible using LogTRAK.

MANTIS 1 (M1)

A precision blend of sophisticated computer and beautiful timepiece, the M1 is very similar to the M2 in form and function. It's the dive computer for divers who want the Smart technology offered by SCUBAPRO's ground-breaking Human Factors engineering, but who don't need air integration or an on-board digital compass.

- Targeted to recreational and technical divers as well as CCR divers and freedivers.
- Predictive Multi-Gas ZHL8 ADT MB algorithm accommodates three gases (21-100% O2).
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Optional heart rate monitor records heartbeat and skin temperature (with SCUBAPRO HRM Belt only) that can be factored into the decompression calculation along with workload.
- Casing is built from the highest marine grade 316L stainless steel with a two-toned brushed finish that both protects and looks great.
- Magnetic control buttons eliminate the need for holes, maintaining the casing's water-

tight integrity and maximizing mechanical reliability.

- Great for freediving.

PLUS:

- Four Dive modes-Scuba, Gauge, Freediving and CCR.
- Swim mode.
- Full topside time-keeping functions.
- Chronograph with lap memory for running.
- Fixed PPO2 CCR algorithm.
- Maximum operating depth: 394ft/120m.
- Segmented LCD display.
- Protective mineral glass.
- Easy-to-read characters and graphics.
- Enhanced logbook for Freediving.
- CR2032 user replaceable battery rated two years/300 dives.
- PC and Mac compatible using LogTRAK with optional cradle.
- Android LogTRAK app is available.

GALILEO SOL

The ultimate SMART dive computer, the Galileo SOL was the first to offer an integrated heart rate monitor as standard equipment, and it comes with the bar-none best digital compass in the business. Loaded with computing, navigation and unique personalization features, wrist-mount dive computers don't get any better than this.

- Predictive Multi-Gas ZHL8 ADT MB algorithm allows you to use up to three nitrox mixes (21-100% O2) during the dive.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Hoseless gas integration provides tank pressure, true remaining bottom time (RBT), and allows air consumption to be factored into the decompression calculation.
- Integrated heart rate monitor senses your effort, incorporates it into the workload calculation, and then adapts the decompression algorithm.
- Full tilt digital compass with bearing memory provides an effective navigational tool that remains accurate regardless of inclination.

- PLUS:**
- Extra-large dot-matrix screen offers a choice of three display modes.
 - Oil-filled technology allows for a slim display casing that fits comfortably on the arm.
 - Huge memory stores pictures, tables, tissue loading status and the most recent 100 hours of diving.
 - Freediving and Gauge modes.
 - Trimix Algorithm can be downloaded via SCUBAPRO.com.
 - Maximum operating depth: 1082ft/330m.
 - Continuously updated average depth display.
 - Active backlight.
 - Bookmark function.
 - User changeable CR12600SE or CR2NP battery is good for three to five years or 300 to 500 dives.
 - Dive/Freediving logs can be stored and analyzed with a PC/Mac via Infrared technology.

GALILEO LUNA

The LUNA comes with a choice of display screens, an intuitive menu system and the best electronic compass around. In fact, it offers all of the core SCUBAPRO technology and features you'll find on the Galileo SOL except for the Predictive Multi-Gas feature and the Heart Rate Monitor. If you ever want to upgrade, these two features are available as optional purchases and can be added quickly and easily.

LED & SMART + TRANSMITTER

Enjoy the convenience of air integration without the hassle of a dangling hose. This low-profile Smart transmitter works with SCUBAPRO's most advanced dive computers. It screws into a high pressure port on your first stage and relays tank pressure and true remaining bottom time (RBT) to the computer screen. The latest version features a built-in LED that gives you an estimate of pressure when the first stage is attached to a tank. This lets you know if the tank has gas without needing to activate the computer.

PRICES	
MSRP	373.00

Part Number	Description
05.055.020	Smart +
05.055.030	Smart + LED

- Easy to use, you only need to pair it to your computer once—the first time you use it.
- Coded transmission technology prevents interference between different dive computers.
- Compatible with Galileo Sol, Galileo Luna and M2 personal dive computers.

CHROMIS

SCUBAPRO's "sporty" wristwatch-style dive computer, the Chromis is always ready for action, both in and out of the water. Offering all of SCUBAPRO's core features except Predictive Multi-Gas (PMG), the Chromis offers full timekeeping functions, a patented stroke counter for surface swimming and a full-featured deco computer for diving.

- ZHL8 ADT MB algorithm accommodates one nitrox mix from 21% to 100% O2.
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Casing features an engraved 316L stainless steel front ring and back plate.
- Four buttons allow for easy menu navigation.
- Extra-sharp alphanumeric characters are inspired by Samurai katanas.
- Continuously updated average depth display in Gauge mode can be reset at any time.
- Zigzag strap design compensates for dive suit compression to maintain a secure fit at depth.

- Deep blue option to match Deep Blue regulator.
- All-black option to match Carbon Fiber regulator.
- Also great for freediving.

PLUS:

- Three Dive modes: Scuba, Gauge and Freediving.
- Swim mode includes surface stroke counter.
- Intuitive menu system.
- Large, easy-to-read display.
- Maximum operating depth: 394ft/120m.
- Full topside time-keeping functions.
- Stopwatch in Scuba and Gauge modes.
- Optional USB connection with cradle.
- Large capacity CR2430 battery.
- Strap extension is included.

INFRARED INTERFACE (IRDA)

This handy accessory provides an Infrared connectivity solution for PCs that are not equipped with built-in infrared ports that allow for the transfer of your dive data from dive computer to SmartTRAK/LogTRAK. Simply plug it into a USB port for quick and easy downloading.

Provides data transfer capability for:

- Aladin One, Aladin Sport, Aladin Prime, Aladin TEC, Aladin TEC 2G, Aladin 2G, Aladin TEC 3G.
- Galileo SOL, Galileo TERRA, Galileo LUNA.
- Smart Pro, Smart COM, Smart TEC, Smart Z.

Systems Compatibility:

- Windows platforms (98, 2000, XP, VISTA, Windows 7). Drivers supplied with device.
- Windows 8. Drivers can be download from SCUBAPRO website.
- MacOS X.
- Windows 10 Drivers available soon.

ALADIN TEC 3G

Featuring a metallic silver faceplate and easy-to-read display, the Aladin Tec 3G is targeted primarily to technical divers who want multi-gas and CCR support functions, but also to recreational divers who appreciate a dive computer with the kind of features that enable them to evolve in their sport. Available as a wrist-mount or as a capsule in a two- or three-gauge console.

- Predictive Multi-Gas ZHL8 ADT MB algorithm accommodates three gases (21-100% O₂).
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N₂ loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.

PLUS:

- Three Dive modes: Scuba, Freediving and Gauge.
- Supports CCR systems (closed circuit rebreather).
- Maximum operating depth: 394ft/120m.
- Altimeter.
- Active back light.
- Bookmark function.
- Lens protection cap.
- CR2450 user replaceable battery rated for two years/300 dives.
- Dive/Freediving logs can be stored and analyzed with a PC/Mac via Infrared technology.

ALADIN TEC 3H

The new Aladin Tec 3H is targeted to avid recreational divers who want a compact dive computer/SPG combination. Featuring a metallic faceplate and easy-to-read display, the 3H offers integrated pressure data, eliminating the need to carry a separate submersible pressure gauge, plus Microbubble technology that lets you adjust for your personal diving style. This makes for an ultra-compact, user-friendly, hose-attached dive computer.

- Integrated pressure data eliminates the need for a pressure gauge.
- Predictive Multi-Gas ZHL8 ADT MB algorithm accommodates three gases (21-100% O2).
- PDIS (Profile Dependent Intermediate Stops) calculates an intermediate stop based on N2 loading, current and previous dives and breathing mixes for safer diving.
- Microbubble levels let you adjust the level of conservatism in the algorithm to match your experience level, age and physical conditioning.
- Available as a stand-alone computer or set in a traditional console with a compass.
- Features a protector boot covering the metal connection between HP hose and DC's HP sensor.

- PLUS:**
- Two Dive modes: Scuba, Gauge.
 - Supports CCR systems (closed circuit rebreather).
 - Maximum operating depth: 394ft/120m.
 - Altimeter.
 - Active back light.
 - Bookmark function.
 - Lens protection cap.
 - CR2450 user replaceable battery rated for two years/300 dives.
 - Dive logs can be stored and analyzed with a PC/Mac via Infrared technology.

ALADIN SPORT

A compact and intuitive dive computer that is available as a wrist mount, or as a capsule in a two- or three-gauge console.

- Nitrox compatible 21-50% in 1% increments.
- Three modes: Deco, Freediving and Gauge.
- 12 and 24 hour mode.
- Automatic safety stop with user adjustable timer.
- Full watch functions.
- Adjustable ppO2 between 1.0 and 1.6bar.
- Maximum operating depth: 394ft/120m.
- Back light.
- Visual and audible alarms.
- Dive/Freediving logs can be stored and analyzed with a PC/ Mac via infrared technology.
- CR2450 user replaceable battery rated for two years/300 dives.

DIGITAL 330M

Although targeted primarily to technical divers, the Digital 330M is an ideal data delivery system for beginning divers, and a useful backup instrument for any diver. Whatever your skill level, the Digital 330M can be counted on to provide outstanding electronic accuracy in all diving conditions.

- Incorporating state-of-the-art technology, a bevy of information is provided in a compact information center.
- Data includes actual and maximum depth, ascent speed, dive time in minutes and temperature.
- Auto on/off feature means it's always ready to dive after a quick self-test.
- Variable ascent rates are displayed in a percentage and with a fast ascent warning.
- Depth-rated to 1082ft/330m to suit all technical deep-diving scenarios.
- Surface interval is displayed for 24 hours for safety and convenience.
- Logbook provides data for the last nine dives to allow for post-dive review and analysis.
- Provides automatic altitude compensation when changing dive locations.

FS-2 COMPASS

The FS-2 compass provides a unique tilt angle of up to 35 degrees, making it easier to read and operate in almost any position. With a floating magnet separate from the compass rose, the FS-2 has greater operating freedom than conventional compasses. This means you can use the same compass for both Northern and Southern hemispheres, making it the perfect navigation instrument for traveling divers.

- Scratch-resistant and durable oil-filled polycarbonate case.
- Highly luminous dial for easy reference in low light conditions.
- Side view window for easy and accurate navigation.
- Available in a wrist model or capsule.

CLASSIC

The Classic, aptly named as it is one of diving's most famous and timeless BCs, combines the best design and construction features of past and present. It is built tough, generously equipped with high-quality hardware, armed with a first-class valve system and offers both impressive buoyant lift and excellent stability. One look at the Classic and you'll understand how it got its name, and why it enjoys such a stellar reputation.

- Constructed of puncture-resistant, polyurethane-coated 420 denier nylon with RF welding.
- Super Cinch tank buckle system locks the tank in rock-solid for maximum stability at depth.
- Fully adjustable cummerbund compensates for suit compression.
- Heavy-duty waist overstrap with stainless steel cam buckle provides additional security.
- Fast-drying padded backpack enhances comfort during long dives.
- Quick-release integrated weight pouches ditch quickly and easily and secure with squeeze buckles
- Rear trim pouches allow you to achieve a well-balanced swimming position.
- Two large Velcro pockets with knife attachment grommets, plus two additional zippered pockets, provide lots of cargo-carrying capability.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide clip-on points for additional gear.

KNIGHTHAWK

Built for serious back-floatation divers looking for a rugged yet bulk-free BC, the Knighthawk offers streamlined stability and comfort well-suited to both recreational and technical diving. Strategically placed padding and quick-release rotating shoulder buckles guarantee a comfortable and snug fit, and numerous performance features make this an easy handling BC.

- Constructed of 1000 denier nylon and 420 denier nylon for maximum durability.
- Contoured hard pack and single-band Super Cinch buckle securely lock down the tank.
- Ergonomic harness incorporates anatomically shaped components to even out the load.
- Rotating Quick Release shoulder buckles and adjustable shoulder straps improve fit.
- Compression straps rein in the air cell when deflated and contribute to optimum volume control.
- Soft neoprene neck roll and padded back pad enhance comfort during long dives.
- Padded cummerbund compensates for suit compression, maintaining a snug fit at varying depths.
- Quick-release integrated weight pouches hold 10 to 12 pounds each and secure with oversized buckles.
- Two rear trim pouches help to create a well-balanced swimming position.
- Dual zippered pockets -- one an expandable rollout -- provide lots of cargo-carrying capability.
- Four pre-bent stainless steel D-rings provide clip-on points for additional gear.

SEAHAWK

The Seahawk is a streamlined back-flotation BC. While similar to the Knighthawk in design, the Seahawk offers over 20% more buoyant lift across its size range, offers a couple extra D-rings for clipping on gear and more low-profile security buckles on its integrated weight system. It also provides a pair of very large traditional-style zippered cargo pockets for carrying accessories, something you don't often see on BCs of this design. Perfect for cold or temperate water diving as well as cruising the tropics, back-flotation divers who want freedom of movement, excellent stability and lots of buoyant lift on a BC with ample gear storage will find the Seahawk the perfect choice.

- Constructed of 1000 denier nylon and 420 denier nylon for maximum durability.
- Ergonomic harness incorporates anatomically shaped components to even out the load distribution.
- Contoured hard pack and single-band Super Cinch buckle let you securely lock down the tank.
- Compression straps rein in the air cell when it is deflated, plus contribute to optimum volume control.
- Soft neoprene neck roll and padded back pad enhance comfort during long dives.
- Padded cummerbund compensates for suit compression.
- Quick-release integrated weight pouches secure with oversized buckles.
- Two rear trim pouches help create a comfortable swimming position.
- Two large zippered pockets with knife attachment grommets provide lots of cargo-carrying capability.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide lots of clip-on points for additional gear.

LADYHAWK

The Ladyhawk brings together all the performance features of the Knighthawk in a back-flotation BC designed and sized specifically for female divers. By positioning the air cell behind the diver, bulkiness in the chest and shoulder area disappears and hydrodrag is reduced. Also, a narrower neck yoke improves fit, all of which results in a completely unencumbered underwater experience that is a joy to behold.

- Constructed of 1000 denier nylon and 420 denier nylon for maximum durability.
- Contoured hard pack and single-band Super Cinch buckle securely lock down the tank.
- Ergonomic harness incorporates anatomically shaped components to even out the load.
- Narrow neck yoke allows for a better fit and improved overall comfort.
- Soft neoprene neck roll and padded back pad enhance comfort during long dives.
- Rotating Quick Release shoulder buckles and adjustable shoulder straps improve fit.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Quick-release integrated weight pouches secure with oversized buckles.
- Two rear trim pouches help to create a well-balanced swimming position.
- An expandable rollout pocket provides lots of cargo-carrying capability.
- Four pre-bent stainless steel D-rings provide clip-on points for additional gear.

LITEHAWK

The Litehawk is the ultimate back-flotation travel BC. Its lightweight, ultra-slimmed-down design and soft, flexible backpack lays flat and compact for packing. The adjustable belt-style waist strap with nylon buckle can be cinched up snug, hugging your body like it was custom made for you while delivering a comfortable, stable ride at depth.

- Constructed of 420 denier nylon for lightweight and long-lasting durability.
- Low-profile, progressively-shaped rear air cell increases range of motion while decreasing drag.
- Elastic cords rein in the air cell when partially inflated and help control deflation.
- Clutter-free ergonomic harness eliminates bulk and enhances freedom of movement.
- Rotating quick-release buckles allow you to optimize the routing of the padded shoulder straps to maximize fit.
- Multiple tank band and strap system keeps tank secure and increases stability at depth.
- Three-dump deflation system lets you to dump air from a variety of underwater positions.
- Two weight pockets are included.
- Two rear trim pouches allow you to achieve a well-balanced swimming position.
- Four aluminum D-rings provide convenient clip-on points for additional gear.

BELLA

Bella was specifically designed, tailored and sized for female divers who prefer the comfort and security of a front-adjustable BC. The Bella is loaded with convenience and performance features, including SCUBAPRO's exclusive wraparound bladder which retains its cradle-like shape even when fully inflated, providing a comfortable fit and stable position both at depth and on the surface.

- Constructed of 420 denier nylon for lightweight and long-lasting durability.
- Special patterns and contoured hip indents take into account the female shape.
- Soft neoprene neck and padded backpack provide for optimum comfort.
- Rotating quick-release shoulder buckles allow you to optimize the routing of your shoulder straps to maximize fit.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Quick-release integrated weight pouches feature a high-security buckle system.
- Two rear trim pockets help to create a balanced swimming position.
- Two zippered pockets provide lots of cargo-carrying capability.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide lots of clip-on points for additional gear.

EQUATOR

With the Equator you can enjoy all the comfort and security of a full-featured front-adjustable BC, along with the light weight and packing advantages of a travel BC. Comfortable and stable at depth, for divers who do lots of local diving as well as travel diving, but prefer to own just one BC, there's no better choice than the Equator.

- 420 denier nylon construction ensures a long and active dive life.
- Wraparound air bladder provides a secure, comfortable ride at depth and on the surface.
- Double band system locks the tank in solid for maximum stability at depth.
- Octopus pockets on each side offer options for carrying a backup second stage.
- Easy-to fold lightweight Airnet backpack is comfortable and makes dive travel so much easier.
- Rotating quick-release shoulder buckles allow you to route your shoulder straps to maximize fit.
- Quick-release integrated weight pouches ditch easily and secure with low-profile squeeze buckles.
- Two large zippered pockets fitted with knife attachment grommets provide lots of cargo-carrying capability.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide convenient clip-on points for additional gear.

GO

Lightweight, easy to pack and extremely comfortable, the Go is a true travel BC. At the same time, it offers all the performance and convenience features you'd expect from a full-featured general-purpose BC. It is well-padded and comfortable yet carries virtually no inherent buoyancy. Generous buoyant lift enables it to be used for temperate water diving as well.

- Constructed of 210 denier nylon covered with polyurethane for lightweight durability.
- Wraparound air bladder provides a secure, comfortable ride at depth and on the surface.
- Coated mesh cummerbund is lightweight and dries quickly and easily.
- Double-band system locks the tank in for maximum stability at depth.
- Rotating quick-release shoulder buckles allow you to optimize the routing of your shoulder straps to maximize fit.
- Airnet padded backpack is water-draining, easy to fold, and enhances comfort during long dives.
- Quick-release integrated weight pouches ditch easily and secure with low-profile squeeze buckles.
- Optional trim weight pockets for better trim in the water.
- Two large low profile zippered pockets fitted with stainless steel knife attachment grommets provide lots of cargo-carrying capability.
- Six aluminum D-rings, two large and pre-bent, provide convenient clip-on points for additional gear.
- The BC folds easy and stows in its own bag for travel or storage.

GLIDE X

The Glide X is a perfect example of a full-featured front-adjustable BC that offers stability, security and all-around comfort. Its wraparound bladder, ample padding and long list of features make this an ideal BC for all diving scenarios.

- Constructed of 420 denier nylon for long life.
- Wraparound air bladder retains its cradle-like shape even when fully inflated.
- Super Cinch tank buckle system locks the tank in solid for maximum stability at depth.
- Adjustable cummerbund compensates for suit compression, ensuring a snug fit at varying depths.
- Rotating quick-release shoulder buckles optimize strap routing to maximize fit.
- Padded back pad enhances comfort during long dives.
- Quick-release integrated weight pouches ditch quickly and easily and secure with buckles.
- Two rear trim pouches allow you to achieve a well-balanced swimming position.
- Two large zippered pockets fitted with knife attachment grommets provide lots of cargo-carrying capability.
- Four large pre-bent stainless steel D-rings, along with two smaller stainless D-rings, provide convenient clip-on points for additional gear.

X-ONE

The X-One is an all-purpose front-adjustable BC that lets you have it your way. Offering a comfortable and secure wraparound air bladder and an efficient valve system for controlling ascents and descents, you can opt for the optional weight pockets or go with a weight belt. Either way, you get a high-performing, stable and feature-rich BC.

- Constructed of 1000D/420D nylon for durability and long life.
- Standard single tank band with nylon buckle keeps the tank from wobbling at depth.
- Cummerbund with overstrap and sternum strap allow you to achieve a snug, comfortable fit.
- Padded backpack provides additional cushioning during long dives.
- Octopus pockets on each side offer convenient places for carrying a backup second stage.
- Two Velcro pockets fitted with knife attachment grommets provide lots of cargo-carrying capability.
- Two stainless steel D-rings provide clip-on points for additional gear.
- Optional quick-release weight pouches offer the choice of an integrated weight system or a weight belt.

X-TEK SIDEMOUNT SYSTEM

Developed in coordination with leading sidemount cave divers, SCUBAPRO's X-TEK sidemount system, with its modular design, quality components and independent air cell, allows you to build a fully customized rig to handle any recreational or technical sidemount dive plan.

- Modular approach lets you build a system to suit your individual diving style.
- Compact independent air cell is available in two sizes, offering 25lbs or 45lbs of lift.
- Harness system is fully adjustable so you can dial in the perfect fit.
- Air cells include a crotch strap for added stability and security.
- Soft Airnet finished backpack ensures comfort during extended dives.
- Stainless steel grommets, D-rings and handles provide plenty of clip-on points and handholds.
- New dump valve, corrugated hose and Balanced Power inflator (BPI) allow for pinpoint buoyancy control.
- Specific elbow and side bungees help keep your dive profile streamlined.
- Bungees and hooks are provided to maximize tank support.
- Optional top cover adds to the overall streamlining of the system, plus increases long-term durability.

X-TEK FORM HARNESS

Three-piece “Form” harness system provides the perfect combination of padding and adjustment for fit and comfort, along with quick-release buckles for the ultimate in ease of use.

- Padded shoulders and anatomical back padding deliver maximum comfort.
- Adjustable shoulder straps contribute to a snug individualized fit.
- Quick-release buckles on both left and right shoulders allow for quick and easy removal.
- Four large stainless steel D-Rings on shoulder straps provide well-placed clip-off points.
- 2in/50mm crotch strap helps dial in fit and includes two stainless steel D-rings.
- Can be used with an optional QR weight pocket system.

X-TEK DONUT WINGS

The shape and internal design of X-TEK donut wings mean you can always expect unparalleled buoyancy control regardless of your diving position.

- Wings are built with a 1680D Ballistic nylon outer shell and a 420D nylon inner bladder.
- Airflow is controlled via a SCUBAPRO Balanced Power Inflator (BPI).
- Available for single or double tank configurations in three lift capacities: 30lbs/13kg, 40lbs/18kg or 60lbs/27kg.

EVERTEC LT

The Evertec LT is a lighter-weight version of the original Evertec drysuit. Constructed of a new Rip-stop fabric that is 25 percent lighter than its predecessor, this material contains a bit of stretch for better flexibility. Combine that with a long list of performance and convenience features and you have a comfortable drysuit that keeps you warm and dry in all water conditions.

- The lightweight but heavy-duty Rip-stop material offers a bit of stretch to enhance flexibility.
- A telescopic torso with elastic crotch strap improves overall fit and increases range of motion.
- Warm neck collar keeps heat in and protects the latex neck seal.
- Diagonal front Ti-Zip MasterSeal® dry zipper allows for easy self-donning and doffing.
- Neoprene socks have no heel seams, increasing comfort and eliminating most sizing issues.
- Quality Si-Tech valves ensure efficient and trouble-free airflow control.
- Two large cargo pockets are equipped with D-rings, high-security overflaps and Velcro closures.
- I-Safe strap on left arm offers a secure mounting spot for a wrist computer.
- Unisex
- Suit includes removable suspenders, an anatomically shaped hood and a patch kit.

EVERDRY 4

The Everdry 4 offers the streamlined fit, comfort and flexibility of a wetsuit, with the thermal properties and water-tightness of a drysuit. The dense neoprene resists compression at depth so can be worn with a thin undergarment or no undergarment at all. Built for comfort, convenience and extended wear, the Everdry 4 fits like a glove, offers excellent range of motion, and most importantly, keeps body heat in and cold water out.

- 4mm high-density neoprene weighs 50% less and is significantly softer than traditional drysuit neoprene.
- Seams are triple-glued and double-thread blind-stitched on the outside; inside they are coated with liquid polymer to create a long-lasting waterproof seam.
- Smooth-skin fold-under neoprene neck seal and straight smooth-skin wrist seals provide comfortable, watertight sealing surfaces.
- Heavy-duty YKK drysuit zipper is covered by a neoprene overflap for added protection.
- Si-Tech balanced side-activated inlet and adjustable outlet valves allow for pinpoint buoyancy control, increasing stability and control at depth.
- Attached neoprene soft socks enable the suit to be turned completely inside-out for cleaning and drying.
- Neoprene soft socks can be worn inside heavy-duty drysuit boots or standard neoprene dive boots.
- Removable suspender system enhances fit and provides convenient lower suit support between dives.
- Handy right-thigh utility pocket with zippered closure provides a secure spot for carrying accessories.
- Heavy-duty kneepads cover a lot of leg area for maximum anti-abrasion protection.
- Includes a 4/5mm anatomically shaped hood, carry bag, repair kit, zipper wax and owners manual.

EXODRY

Offering a unique approach to drysuit design, the Exodry fuses 4mm high-density neoprene with latex wrist and neck seals. It's a winning combination, offering minimal inherent buoyancy, maximum range of motion and an excellent sealing system. The Exodry is a smart choice for all types of diving and can be used with or without an undersuit.

- 4mm high-density neoprene resists compression so buoyancy variations are reduced at depth.
- Latex wrist and neck seals are thin yet durable and provide comfortable, watertight seals.
- Neoprene warm collar covers the latex neck seal to eliminate cold spots and increase comfort.
- Attached rubber boots provide excellent foot protection along with a non-slip sole for negotiating wet boat decks.
- Lightweight, saltwater resistant Ti-Zip® dry zipper is extra strong for years of use.
- SI-Tech valves move lots of air, enabling you to maintain total buoyancy control.
- I-Safe straps on both arms offer secure mounting spots for wrist instruments.
- Heavy-duty kneepads protect both suit and lower legs when working on or near the bottom.
- Convenient zippered cargo pocket lets you safely carry extra gear or accessories.
- Suit comes with a neoprene hood.

CLIMASPHERE UNDERGARMENT

The undersuits of choice for drysuit diving, ClimaspHERE thermal wear keeps you warm with a low profile two-piece insulation system. Breathable and wind-proof, you can wear one or both pieces under your drysuit at depth for total comfort and warmth, and on deck between dives as cozy casual wear.

- Two-piece design enables you to mix and match to achieve the ideal thermal combination.
- Soft four-way stretch fleece material is comfortable and offers unrestricted range of motion.
- Neoprene wrist and ankle cuffs with thumb loops and stirrups make components easier to don and more comfortable to wear under a drysuit.
- Material is lightweight and compact for easy storage and transport.
- Unisex sizing

NOVA SCOTIA 6MM, SEMI-DRY

The perfect solution for staying warm, relatively dry and extremely comfortable while diving in cold or temperate water environments, the Nova Scotia 6mm semi-dry is built with quality neoprene and incorporates SCUBAPRO's Pure Design Concept. Featuring the snug fit of a wetsuit and some of the sealing elements of a drysuit, it offers the best of both worlds in thermal protection.

- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Diamond Span water draining fleece interior insulates almost the entire suit and aids in quick drying between dives.
- Ti-Zip MasterSeal® dry main zipper is flexible yet provides an excellent seal against water entry.
- Ankles and wrists feature double seal zippered closures.
- I-Safe straps on both arms offer non-slip mounting spots for securing wrist instruments.
- Right thigh 3D pocket with hood attachment hook offers lots of room for carrying extra gear.
- Improved protective spine pad increases comfort during extended dives.
- Anti-abrasion Powertex material on shoulders, back, seat and knees delivers extra protection where it is needed most.
- Glued and blind-stitched seams block water entry.
- Internal stress discs installed at stitch intersections protect seams and extend the suit's working life.
- Suit comes with a 6.5/5/3mm hood.
- CE certified a Class A dive suit – rated for water temperatures ranging from 45°F (7°C) to 54°F (12°C).

SPORT 7MM, HOODED SEMI-DRY

Cold-water divers looking for total thermal protection in a comfortable high-stretch wetsuit need look no further. Providing 7mm of neoprene plus an attached hood, the Sport delivers head-to-ankle protection yet is so soft and pliable it fits like a second skin. The suit is made from super soft neoprene and features a triathlon cut that allows for lots of range of motion in the shoulder and arm areas. By providing more freedom of movement than what's found on other 7mm wetsuits, the Sport is must-have thermal protection for all first-time suit buyers.

- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas, allowing for unrestricted arm and shoulder movement when swimming.
- The interior is lined with two plush materials that enhance comfort and warmth, dry quickly and provide cushion beneath wrist and ankle zippers.
- YKK Aquaseal main rear shoulder-to-shoulder dry zipper is super flexible for improved range of motion and prevents water from entering the suit.
- Double zippered seals at wrists and ankles are comfortable, improve flexibility, protect against water entry and simplify donning and doffing.
- Colored panels on the outside of wrists and ankles are design touches; on the inside they seal against the skin to prevent water entry.
- Glued and blind-stitched seams keep warmth in and water out.
- Abrasion-resistant fabric on shoulders, seat and knees protect against shifting gear or when sitting or kneeling.
- Attached hood creates the total thermal protection system.
- High-stretch neoprene is great for hard-to-fit divers who can now enjoy a suit that molds comfortably to his or her body.

EVERFLEX 7/5MM

The ultra warm and comfortable Everflex 7/5mm uses SCUBAPRO's exclusive Pure Design Concept for even better fit and freedom of movement than what was offered in previous versions of the suit. Pre-formed dimensional shapes allow this top-rated suit to move more naturally with your body, delivering unparalleled comfort and flexibility. All 2016 Everflex steamers are assembled using an innovative solvent-free water-based glue, a 100 percent green process.

- Made from 100 percent Everflex neoprene, an X-Foam formulation, for durability and better health.
- Suit is assembled using a solvent-free water-based glue, a 100 percent green process.
- Multi-thickness panels deliver a superior combination of warmth and flexibility.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Double blind-stitched outer seams are durable and watertight, and single blind-stitched inner seams are comfortable against bare skin.
- Diamond Span inner lining's water-draining material enhances cold-water protection. For 2016, it is combined with a second lining for improved stretch, making donning and doffing that much easier.
- Diagonal back zipper offers increased long-term durability and ease of use.
- Glideskin seals at the wrist, ankles and neck minimize water intrusion.
- Ankle zippers aid in donning and doffing the suit.
- Compression-molded zipper flap/spine pad reduces water entry and increases back protection.
- Tatex knee and shoulder pads offer protection against abrasion.
- Improved fit.
- Seat area is also protected with an abrasion-resistant outside lining to increase durability and extend the life of the suit.
- Extensive range of sizes for both men and women means all divers can enjoy the perfect fit and the ultimate in comfort.

BLUE DIAMOND SPAN inner lining with water-draining material enhances cold-water protection.

SPORT 7MM

Here's the ideal wetsuit for new divers who enjoy cold water diving. As comfortable as a cold-water steamer can be, the Sport 7mm fits like a second skin. It is made from super-soft neoprene and features a triathlon cut that allows for lots of range of motion in the shoulder and arm areas. The suit is easy to put on and take off and it provides much more freedom of movement than traditional 7mm wetsuits, making it a smart choice for first-time suit buyers.

- Softer and more flexible neoprene, makes it easier to put on and take off, maximizes range of motion and improves overall comfort.
- Pure Design Concept uses fewer seams and panels for maximum flexibility.
- Triathlon cut employs wider panels covering the underarm and back areas, allowing for unrestricted arm and shoulder movement when swimming.
- Wrists and ankles are fitted with sealing panels backed by zippered closures that help keep water out and aid in pulling the suit over arms and legs.
- The interior is lined with two plush materials that enhance comfort and warmth, dry quickly and provide cushion beneath wrist and ankle zippers.
- Glued and blind-stitched seams keep warmth in and water out.
- Diagonal-cut YKK rear zipper is comfortable, improves flexibility and simplifies donning and doffing.
- Abrasion-resistant fabric on shoulders, seat and knees protect against shifting gear or when sitting or kneeling.
- High-stretch neoprene is great for hard-to-fit divers who can now enjoy a suit that molds comfortably to his or her body.

(STRETCH)

DEFINITION 5MM

The Definition 5mm steamer is built with the Body Map System, a manufacturing method that uses a 3D cut, special tailoring and material inserts to create a suit that fits the body like a glove, provides extra stretch where it's needed most, and offers a level of warmth, comfort and durability well-suited to active temperate-water and warm-water divers.

- CE certified as a Class B dive suit - rated for water temperatures ranging from 50°F (10°C) to 64.5°F (18°C).
- Made from X-Foam neoprene, the only "green" neoprene that complies with P.A.H. regulations.
- Ultraspan chest panel and Stretchtec side panels work together to produce a highly flexible and snug fit.
- Infrared (IR) fleece interior lining reflects body heat for extra thermal insulation and is extremely soft against the skin.
- Zippered seals at wrists and ankles plus a rear diagonal zipper block water entry, are comfortable and make the suit easy to put on and take off.
- Abrasion resistant fabric on shoulders and seat, along with elbow pads and kneepads, increase long-term durability.
- Spine pad cushions the tank, providing additional comfort during extended dives.
- Small neck zipper enhances topside comfort, eliminating the need to remove the suit between dives.
- I-Safe strap keeps a wrist instrument securely attached.

PYROFLEX STEAMER

PRICES	
MSRP	249.00

When it comes to thermal protection, nothing beats neoprene, and the new Pyroflex 1.5mm steamer takes that to heart. This revolutionary steamer features an outer layer made from a special water-repellant, high-stretch Everflex neoprene. Backing up this quality neoprene is an inner layer made up of a combination of high tech fleece and plush. These exterior and interior materials work together to deliver outstanding thermal protection, plus they are super comfortable and dry quickly. The result is the ultimate in thermal protection for tropical diving, snorkeling, or pool training.

Remember, neoprene provides divers and snorkelers with genuine thermal protection, while garments made from other fabrics or material blends simply do not. Pyroflex steamers don't just provide protection from scrapes and stings, they provide bona fide thermal protection. And that's the most important type of protection a diver or snorkeler can have when spending long periods of time in the water.

- Quality exterior Everflex is an X-Foam neoprene formulation, which is lightweight, durable and a highly efficient insulator for heat retention.
- High tech plush and fleece interior linings reduce water flow and provide extra warmth.
- Offers water blocking to reduce convection.
- Provides insulation under water as well as at the surface.
- A slightly higher neck collar delivers maximum comfort from BC chafing.
- Thumb loops and heel stirrups avoid ride-up when the steamer is used as an under layer.
- Premium YKK front zipper makes easy work of donning and doffing

PYROFLEX RASH GUARD, LONG SLEEVE

Pyroflex 1.5mm rash guards don't just provide protection from scrapes and stings, they provide bona fide thermal protection with a revolutionary design and high tech materials ideal for tropical diving, snorkeling, or pool training. Made with special water-repellant, high-stretch Everflex X-Foam neoprene on the outside and a combination of fleece and plush on the inside, these tops offer warmth, comfort and lots of range of motion, plus they dry quickly. Available in a choice of long or short sleeves, Pyroflex rash guards help keep divers and snorkelers warm when spending long period of time in the water, and they are also great for layering.

- Totally new approach to rash guard design provides divers and snorkelers with genuine thermal protection, something you won't find with rash guards made from other fabrics.
- Quality exterior Everflex, an X-Foam neoprene formulation, is lightweight, durable and a highly efficient insulator for heat retention.
- High tech plush and fleece interior linings reduce water flow and provide both comfort and extra warmth.
- Design helps block water intrusion to reduce convection.
- Provides effective insulation under water as well as at the surface.
- A slightly higher neck collar delivers maximum comfort and protects from BC chafing.
- High-stretch neoprene is easy to don and doff and offers excellent range of motion.

TROPICAL STEAMER, 1MM

This lightweight 1mm steamer delivers optimal comfort and flexibility for warm-water divers. Featuring Everflex styling and 1mm neoprene with stretch fabric, the Tropical comes with a plush torso lining and anti-abrasion panels on shoulders, seat and knees. It offers the perfect level of full-body protection, and its construction makes it super affordable for tropical diving or any watersport activity.

- Made from 100 percent 1mm Everflex neoprene, an X-Foam formulation, for durability and better health.
- Interior torso plush lining is comfortable and increases warmth without adding bulk.
- Heavy-duty Tatex printed kneepads and shoulder patches provide superior anti-abrasion protection.
- Rear diagonal zipper with PVC patch makes easy work of donning and doffing the suit.
- Thumb loops and feet stirrups prevent ride-up when using as a first layer beneath a wetsuit.

PROFILE 0.5MM

This ultra thin neoprene steamer can be used as a warm-water wetsuit or as a base layer beneath a thicker wetsuit for cold-water diving. Built with a quality nylon/neoprene blend on the outside for durability and a comfortable Silverskin inner lining, this lightweight steamer features the distinctive Profile pattern and styling and includes Powertex anti-abrasion panels and Tatex kneepads.

- Made of 100 percent N2 0.5mm neoprene formulated from eco-friendly X-Foam.
- Everflex flexible panels maximize flexibility and range of motion.
- Silverskin interior features a cell finish with a 'Metalite' coating for extra warmth retention.
- Non-chafing flat-seam stitching is comfortable against bare skin.
- Thumb and foot straps make it so much easier to put on the suit, plus prevent ride-up.
- Rear zipper looks great ergonomically plus aids in donning and doffing.
- Anti-abrasion Powertex material on seat and shoulders and Tatex kneepads offer lots of abrasion protection.

HEAVY-DUTY BOOT, 6.5MM

If you have ever suffered from cold feet or found yourself stumbling over sharp rocks as you made your way down to the beach, you'll appreciate this dive boot. Built to handle the tough stuff, it is both durable and comfortable, making it the ideal wetsuit boot for cold water and harsh conditions. Now with a Diamond Span interior for improved warmth.

- Heavy-duty nylon 2-sided neoprene ensures comfort and durability.
- Reinforced toe and heel provide protection against the elements.
- Heavy-duty rubber anti-slip molded sole protects feet from sharp rocks and craggy surfaces.
- Velcro zipper-end patch secures the side zipper when closed.

HEAVY-DUTY SHORT BOOT, 3MM

The Heavy-Duty 3mm Short Boot shares many of the bullet-proof features that make the 6.5mm boot so dependable and durable. However, the Short Boot's upper is cut low for added comfort and convenience when diving in warmer water temperatures. This low-cut styling also eliminates the need for a zipper.

HEAVY-DUTY DRYSUIT BOOT

A must-have boot for any drysuit diver who hikes or climbs to a dive site. This sturdy boot can handle the most rugged shoreline terrain and is designed to fit comfortably over the neoprene or latex sock of any drysuit.

- Lace-up design lets you quickly and easily achieve a snug, secure fit.
- Heavy-duty ultra-grip sole protects the foot when traversing rocky shorelines.
- Neoprene upper is ultra flexible, enhancing overall comfortable.
- Toe and heel are reinforced with durable rubber caps to protect both boot and foot.
- Heel cap features a fin strap keeper to eliminate slippage when engaged in aggressive kicking.
- Boot comes with a water-draining mesh storage bag.

EVERFLEX BOOT, 5MM

This extremely flexible neoprene boot is the perfect choice for anyone who dives in an Everflex steamer, although its design features and thermal properties can also be appreciated by wearers of other wetsuits. The boot is designed without a side zipper or Velcro closure, yet its pliable neoprene allows for easy donning and doffing. It also provides a great seal while allowing total freedom of movement.

- Classic sole provides a protective cushion against uneven terrain as well as a non-slip surface to handle wet boat decks.
- 105-degree ankle slant enhances fit and greatly improves comfort while kicking.
- Reinforced toe and heel provide protection against the elements.
- Heel cap includes a molded fin strap keeper to eliminate strap slippage.
- Diamond Span interior improves both warmth and comfort.
- No zip keeps boot comfortable and well-fitted.

DELTA BOOT, 5MM

While the Delta 5mm boot is built more for temperate water diving, you get all the same features and fit, comfort and protection, offered by the Delta 6.5mm, plus you have a wider selection of sizes to choose from.

- A sturdy outsole and rubberized armor provide excellent protection on both the top and bottom of the boot.
- The top of the foot is both cushioned and protected against abrasion from the edge of the fin pocket.
- Built-in arch support increases comfort when traversing rocky shorelines.
- The reinforced toe and heel caps extend boot life. The heel cap includes a molded fin strap keeper.
- The long zipper is great for easy donning and doffing and is fitted with a gusset to cut down on water seepage.
- The aggressive anti-slip tread is non-marking, a feature boat owners always appreciate.
- Velcro zipper-end patch secures the side zipper when closed.

DELTA SHORT BOOT, 3MM

This comfortable 3mm short boot is designed for tropical diving and snorkeling. Low-cut, lightweight, with just the right amount of protection, it slips on and off without the need for a zipper.

- Provides full-featured foot protection for warm-water diving.
- Light comfort sole offers good protection without being stiff or heavy.
- Can be comfortably worn with adjustable fins.

DECK SOLE, 5MM

The Deck Sole is a comfortable 5mm boot that features a streamlined design and deck-shoe styling. It sports a non-skid, non-marking flexible rubber sole, making it a great choice for foot protection when boat diving in temperate waters.

- Deck-shoe styling with a non-skid and non-marking sole.
- 105-degree slant in the ankle area mimics the foot's orientation in its natural swimming position.
- Rubber sole is flexible, adding to overall comfort.
- Gusseted zipper makes it easy to don and doff, plus helps keep water out.
- Protective heel cap includes an integrated fin strap retainer.
- Velcro zipper-end patch secures the side zipper when closed.

BASE BOOT, 5MM

An economical boot built for temperate water diving, the Base boot features a sturdy outsole that provides excellent protection. The aggressive anti-slip tread is non-marking, a feature boat owners always appreciate.

- Built-in arch support increases comfort when traversing rocky shorelines.
- The reinforced toe and heel caps extend boot life. The heel cap includes a molded fin strap keeper.
- The long zipper is great for easy donning and doffing and is fitted with a gusset to cut down on water seepage.
- Velcro zipper-end patch secures the side zipper when closed.

HYBRID SOCKS, 2MM

Divers looking to enjoy some additional foot protection will want a couple pairs of these 2mm socks in their dive bags. They provide protection against chafing and add a bit of warmth. Wear them when diving with full foot fins in warm water, or as a thermal layer inside your dive boots when diving in cold water. Great for freedivers.

- Textured sole provides a non-slip surface for walking on wet boat decks.
- Glideskin cuffs create an effective seal, minimizing water transfer.

EASYDRY PRO DRY GLOVE

These gloves are designed for use with drysuits, semi-dry suits and wetsuits. The elastic latex cuff seal ensures the glove is waterproof. The gloves are manufactured from high-quality vulcanized latex which gives them a high elasticity and makes them very resistant to puncturing and tearing. The rough surface allows for a perfect grip on instruments, valves or regulator. The anatomic shape of the gloves allows prolonged use without causing fatigue.

EVERFLEX GAUNTLET GLOVE, 5MM

PRICES

MSRP	77.00
------	-------

This rugged 5mm gauntlet-style glove is designed with an extra-long cuff for wearing over steamer sleeves. The cuff extends well up the forearm and provides incredible sealing properties. Offering a snug and secure fit, it will keep your hands toasty warm in cold water.

- Made of 100 percent Everflex, an eco-friendly X-Foam formula neoprene.
- Long cuff reaches comfortably up over a wetsuit sleeve.
- Anti-abrasion fabric on palms and fingers improves grip and dexterity.
- Wrap-around Velcro band/pad makes it easy to pull gloves on and creates secure closures.
- Ring/hook attachment allows for easy glove pairing and attachment to the suit.
- Now with Diamond Span inside to improve warmth.

EVERFLEX GLOVE, 5MM

PRICES

MSRP	42.00
------	-------

Made of 100 percent Everflex neoprene, this 5mm double-seal cold-water glove offers the ultimate in warmth and comfort while providing maximum finger flexibility. The new Diamond Span lining is comfortable, dries fast and seals extremely well.

- Everflex neoprene features enhanced abrasion resistance for years of reliable use.
- Textured fingers and palm provide a good gripping surface.
- Blind-stitch construction eliminates water seepage through the seams.

EVERFLEX GLOVE, 3MM

Offering the same quality construction and features as the Everflex 5mm glove, but in a 3mm version for temperate- to warm-water diving.

- Everflex neoprene features enhanced abrasion resistance for years of reliable use.
- 3mm neoprene offers excellent finger dexterity.
- Textured fingers and palm provide a good gripping surface.
- Ultra smooth Silverskin lining consists of a cell finish with a 'Metalite' coating for extra warmth retention.
- Lining dries fast and seals extremely well.
- Donut ring technology reduces water penetration.

SEAMLESS GLOVE, 1.5MM

Using heat taping instead of traditional stitching transforms this lightweight 1.5mm glove into an extremely soft, flexible and tactile hand-warmer. By eliminating the stitching you gain in dexterity in the fingers, making it much easier to push dive computer buttons and handle gear at depth.

- Printed palm provides a non-slip surface for maintaining a secure grip.
- Palm material is not coarse so will not scratch your face when brushing hair away to make a mask seal.
- Ultra-flexible neoprene makes easy work of donning and doffing.

TROPIC GLOVE, 1.5MM

Soft tropical glove features a 1.5mm neoprene back for added comfort and warmth. The glove provides excellent protection against infection-prone finger cuts when grasping barnacle-encrusted dive ladders in tropical waters.

- Reinforced fingertips and palm increase durability while ensuring a non-slip grip.
- Amara fabric layer on palm is resistant to punctures and remains soft when dry.
- Velcro wrist seal is adjustable to ensure a snug fit.

EVERFLEX HOODED VEST, 5MM, UNISEX

This classic 5mm hooded vest is offered in 100% Everflex neoprene for superior stretch and comfort. The additional layer of neoprene covering the torso protects the body's core thermal area, and the attached hood is effective at sealing off the head, which can be responsible for much heat loss. Designed to layer with any SCUBAPRO steamer, this hooded vest features graphics on side panels for a modern look.

- Provides extra warmth over the torso and head, two critical areas for minimizing heat loss.
- Everflex neoprene is super-stretchy so it's easy to don and doff.
- Fast-drying, the vest remains comfortable for use and reuse during a long dive day.

EVERFLEX HOODED VEST, 2.5MM, UNISEX

When having slightly less thermal layering is the plan for the dive day, SCUBAPRO offers this thinner, lighter 2.5mm version of its classic hooded vest. Made from 100% Everflex neoprene, it is flexible and comfortable, making it the ideal thermal under layer for any SCUBAPRO steamer.

- Provides a thin neoprene protective layer over the torso and head, two critical areas for minimizing heat loss.
- Everflex neoprene is super-stretchy so it's easy to don and doff.
- Fast-drying, the vest remains comfortable for use and reuse during a long dive day.
- Light graphic print on side panels enhances styling.

EVERFLEX 1MM RASH GUARD, LONG SLEEVE

This is one stylish rash guard, and it performs as good as it looks. Built with Everflex (X-Foam) neoprene, it features a cozy Heliospan torso lining that delivers a boost of warmth right where you need it most. Offering high-stretch comfort, wear it with a pair of SCUBAPRO Hybrid Shorts; a loop is included so you can connect the two together to eliminate ride-up while diving.

FLEECE RASH GUARD, LONG SLEEVE

This rashie lets you add a thermal layer underneath a wetsuit. Or, you can wear it by itself to chase away the chill between dives. The ultra-stretch fleece material is really comfortable against the skin, and it dries quickly so it won't suck heat from your body. A soft, high-cut neck acts as a buffer against chafing wetsuit collars and also protects against sunburn (it provides UPF-50 protection against UV rays). It is available in a wide range of sizes so you can achieve that perfect fit.

HYBRID CARGO SHORTS, 1MM

Comfortable and stretchy, the Hybrid Cargo Short form-fits to your body like you were born wearing a pair. This versatile watersports short is made of a combination of 1mm X-Foam neoprene and durable nylon. Designed to be worn either by itself or over a dive suit, it comes with a nylon drawstring and reinforced seat. It also includes two large cargo pockets for carrying money, sunglasses or other accessories when enjoying a day on the beach or dive boat.

HYBRID SHORTS, 1MM - MEN

This new version of the popular Hybrid Cargo Short is built with the same quality 1mm X-Foam neoprene and durable nylon as the original, and it includes a convenient drawstring, but it doesn't have pockets. This creates a more streamlined design that enables you to wear this short over – or under – virtually any type of dive suit. Of course, you can always wear it by itself, or better yet, add a stylish rash guard to create the perfect beach or boat ensemble.

FRAMELESS

SCUBAPRO's classic Frameless is diving's original frameless mask and it continues to be the mask of choice among professional divers throughout the world. Its single lens design features a distinctive rectangular shape that provides an excellent view on the periphery as well as straight ahead. The soft silicone skirt is comfortable yet durable, and the double-edge seal feels good against the skin.

- Frameless single-lens design provides an expansive field of view while reducing volume.
- Soft silicone skirt uses a double-seal system for a comfortable, leak-proof fit.
- Traditional buckles attach to the skirt, enabling the mask to be folded flat for traveling.
- Wide headband allows for a comfortable fit against the back of the head.

FRAMELESS GORILLA

The Frameless Gorilla has a slightly larger and wider lens, and a slightly larger skirt in a matte finish. Otherwise, it shares the same classic single lens design and long list of comfort and performance features as the original Frameless.

- Extra-large single-lens provides an expansive field of view while reducing volume.
- Slightly larger double-seal matte skirt creates a comfortable, watertight seal on larger faces.
- Traditional buckles attach to the skirt, enabling the mask to be folded flat for traveling.
- Wide headband allows for a comfortable fit against the back of the head.

MINI FRAMELESS

This down-sized frameless mask is perfect for small or narrow faces. While offering the same successful double-seal skirt as the full-sized Frameless, the single lens on this mask offers a more traditional rounded-edge shape that flairs out to produce a wide field of vision. The push-button buckle system is easy to use and allows for quick adjustments. Buckles attach to flexible tabs on the skirt; this optimizes strap angle when dialing in fit.

- Rounded-edge single lens design provides an expansive field of view while reducing volume.
- Slightly smaller double-seal skirt creates a comfortable, watertight seal on smaller faces.
- Push-button buckles attach to tabs on the skirt to optimize range of motion when dialing in fit.
- Buckles attach to the skirt, enabling the mask to be folded flat for traveling.
- Wide headband allows for a comfortable fit against the back of the head.

SYNERGY 2 TRUFIT

Called the most comfortable dive mask on the market, you have only to try on a Synergy2 to feel the difference. Made with SCUBAPRO's new-generation Trufit Technology, its double-skirt design has proven to be ultra comfortable during extended periods under water while providing a watertight seal. Trufit's unique ribbed system molds to the contours of most faces. The single lens provides excellent field of view, and the buckle system is easy to use. The mask frame is spray painted for that premium look.

- Ultra-clear glass provides a bright and clear view of the underwater world.
- New-generation Trufit Technology design uses two skirts for creating a comfortable, watertight seal.
- Main skirt offers a thin and soft silicone material for the best possible fit, seal and comfort against the skin.
- Outer skirt, made with firmer silicone, provides support and rigidity where needed.
- Trufit Technology can be identified by its unique ribbing texture.
- Quick-release buckles attach to tabs on the skirt to optimize range of motion when dialing in fit.
- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.
- Mirrored lens option delivers a glare-free view of the underwater world.

TRUFIT TECHNOLOGY — FEELS LIKE NOTHING. FITS LIKE NOTHING ELSE.

SCUBAPRO's revolutionary Trufit mask skirt design forms a watertight seal on virtually any face, allowing divers to have a secure mask without sacrificing comfort. Trufit mask skirts are designed with the highest quality silicone and are identifiable by their unique ribbing texture.

Synergy2 Trufit

The newest generation of Trufit technology features two separate silicone skirts. The main inner skirt is thin and soft to provide the best possible fit, seal and comfort against the skin. The outer skirt is thicker to provide support and rigidity near the mask frame.

Synergy Trufit

Second generation Trufit technology features one skirt made of two thicknesses of silicone. The silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity. The silicone contouring the face is thinner, providing a pliable, extremely comfortable watertight seal.

Spectra Trufit

First generation Trufit technology features a single skirt made with uniformly thin silicone for maximum comfort and flexibility.

SYNERGY 2 TWIN TRUFIT

Called the most comfortable dive mask on the market, you have only to try on a Synergy2 Twin to feel the difference. Made with SCUBAPRO's new-generation Trufit Technology, its double skirt system has proven to be ultra comfortable during extended periods under water while providing a watertight seal on virtually all face shapes. This low-volume dual-lens version provides excellent field of view, and the buckle system is easy to use. The mask frame is spray painted for that premium look.

- New-generation Trufit Technology design uses two skirts for creating a comfortable, watertight seal.
- Main skirt offers a thin and soft silicone material for the best possible fit, seal and comfort against the skin.
- Outer skirt, made with firmer silicone, provides support and rigidity where needed.
- Trufit Technology can be identified by its unique ribbing texture.
- Quick-release buckles attach to tabs on the skirt to optimize range of motion when dialing in fit.
- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.
- Mirrored lens option delivers a glare-free view of the underwater world.

TRUFIT TECHNOLOGY — FEELS LIKE NOTHING. FITS LIKE NOTHING ELSE.

SCUBAPRO's revolutionary Trufit mask skirt design forms a watertight seal on virtually any face, allowing divers to have a secure mask without sacrificing comfort. Trufit mask skirts are designed with the highest quality silicone and are identifiable by their unique ribbing texture.

Synergy2 Trufit

The newest generation of Trufit technology features two separate silicone skirts. The main inner skirt is thin and soft to provide the best possible fit, seal and comfort against the skin. The outer skirt is thicker to provide support and rigidity near the mask frame.

Synergy Trufit

Second generation Trufit technology features one skirt made of two thicknesses of silicone. The silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity. The silicone contouring the face is thinner, providing a pliable, extremely comfortable watertight seal.

Spectra Trufit

First generation Trufit technology features a single skirt made with uniformly thin silicone for maximum comfort and flexibility.

SYNERGY TWIN TRUFIT

The Synergy Twin benefits from SCUBAPRO's second-generation Trufit Technology. This design approach features a mask skirt with thicker, firmer silicone near the mask frame to provide support and rigidity, and thinner silicone contouring the face for comfort and to ensure a watertight seal. It's an effective combination that delivers a truly unique fit and seal.

- Trufit Technology can be identified by its unique ribbing texture on the mask skirt.
- Silicone near the mask frame is thicker and firmer with a matte finish for additional support and rigidity.
- Silicone contouring the face is thinner, providing a pliable, comfortable watertight seal.
- Quick-release buckles attach to tabs on the skirt to optimize range of motion when dialing in fit.
- Buckle tabs are flexible, enabling the mask to be folded flat for traveling.
- Mirrored lens option delivers a glare-free view of the underwater world.
- New colors are paired perfectly to yellow and purple Seawing Nova fins.

The silicone contouring the face is thinner, providing a pliable, extremely comfortable watertight seal.

Spectra Trufit

First generation Trufit technology features a single skirt made with uniformly thin silicone for maximum comfort and flexibility.

SPECTRA TRUFIT

This Spectra dual lens mask is built with SCUBAPRO's first-generation Trufit Technology, an approach to skirt design that uses very thin and soft silicone for comfort, with small ribs to provide stability. The result is a silicone skirt that keeps water out and is so soft it will mold to virtually any face shape.

- Ultra-clear dual lens design keeps volume low and widens field of view.
- Trufit Technology delivers a comfortable seal that keeps water out.
- Quick release buckles adjust easily for that perfect fit.
- Special nose pocket design makes easy work of equalizing.
- Exclusive paint process transforms your dive mask into stylish eyewear.

FULL-FACE MASK

SCUBAPRO's Full-Face Mask is a professional-quality mask designed for maximum safety and comfort while diving in very cold water, diving in wrecks or caves or when technical diving. The design is also ideal for using a secondary air source, diving in contaminated environments or employing an underwater communication system. The mask is widely used by military and commercial divers worldwide.

- Reduced weight increases comfort during extended dives.
- Design features separate compartments for nose and mouth.
- Top compartment is equivalent to a two-lens mask.
- 5 point "spider" strap system enables mask to perfectly fit the face and comfortably spread strap tension.
- Stainless steel, quick-adjust, positive-lock buckles provide safety, comfort and reliability.
- Mineral anti-fogging treated lenses offer a clear field of view.
- Chemically resistant silicone skirt prevents damage when diving in contaminated waters.
- One-way valve provides an optional alternate air source adapter.
- Direct inhalation is possible with or without internal mouthpiece.

NEXUS

The low-drag Nexus is fitted with a rotating mouthpiece so you can position it perfectly for maximum comfort. It also has an angled purge valve to divert bubbles out of the line of sight. The oval shape of the upper tube minimizes drag and allows for a lot of air to flow. It is also flexible, so if you don't want to hang the Nexus from your mask strap, you can fold it up and stow it in a BC pocket.

- Splashguard top design helps keep water from entering the large-bore barrel.
- Flexible, corrugated section is easy to use and drops away from face when not needed.
- Angled purge directs bubbles out of your sight line.
- Ergonomic mouthpiece offers maximum comfort during long snorkel sessions.
- Flexible upper barrel allows snorkel to be folded for stowing.
- Quick-connect clip makes it easy to attach or remove snorkel from mask strap.

SPECTRA DRY

The restyled Spectra Dry's large-bore upper tube allows plenty of airflow, and its dry top actually seals the tube when the snorkel is submerged so no clearing is needed upon resurfacing. An efficient purge valve expels any water that might seep in. The flexible lower tube hangs down and out of the way when not being used.

- Large-bore upper tube with dry top is designed for dry and easy breathing.
- Corrugated silicone lower tube allows the mouthpiece to hang out of the way when breathing off a regulator.
- Purge valve, positioned at the lowest point, takes care of any water that might enter the airway.
- Regulator-style mouthpiece offers good bite tabs for a comfortable fit, ideal for extended snorkeling adventures.
- Quick-connect clip makes it easy to attach or remove snorkel from mask strap.

VERVE

Featuring a colorful upper barrel matched with a vibrant black corrugated hose, this snorkel looks as good as it works. Made of the highest quality polyurethane and silicone compounds, the Verve's elliptical upper barrel is shaped to minimize drag when snorkeling. All-round splash protection is provided on top, with a high-quality purge valve down below to expel any errant water drops.

- Quality polyurethane and silicone construction ensure reliability and long life.
- Elliptical barrel is fitted with splash protection on top to promote continuous dry breathing.
- Proprietary splash protection limits water entry while surface swimming.
- Drop-away corrugated hose features an efficient purge valve and rotating regulator-style mouthpiece.
- Quick-connect clip makes it easy to attach or remove snorkel from mask strap.

LAGUNA 2

This lightweight snorkel features a proprietary dry valve on the top of the barrel that immediately closes upon contact with water. Combined with the self-draining lower purge valve, the Laguna 2 provides continuous dry breathing when out snorkeling or when surface swimming after a dive.

- Lightweight design and ergonomic mouthpiece eliminate jaw fatigue when snorkeling long distances.
- Dry upper valve automatically closes upon water contact.
- Flexible, corrugated lower section is easy to use and drops away from the face when not needed.
- Large one-way purge takes care of any water that might seep into the barrel.
- Quick-connect clip makes it easy to attach or remove snorkel from mask strap.

SEAWING NOVA

PRICES

MSRP	204.00
------	--------

Setting the bar in dive fin design, the multiple-award-winning Seawing Nova delivers the power, acceleration and maneuverability of a blade fin, with the kicking comfort and efficiency of a split fin. Combining classic SCUBAPRO fin technology with the latest innovations in hydrodynamic design, divers will be hard-pressed to find a fin that's more comfortable to wear or fun to kick when cruising the underwater world.

- Built with a space-age Monprene elastomer that is virtually indestructible.
- Proprietary G4 articulated joint allows the entire blade to pivot and generate thrust.
- Wing-shaped blade creates a near-perfect balance of stiffness and flex.
- Variable Blade Geometry wing tips arc upwards, providing more power and increasing stability.
- Pivot Control Technology ensures that the most efficient 45-degree angle of attack is maintained no matter how easy or hard you kick.
- Marine-grade bungee strap is self-adjusting, comfortable, extremely durable, and makes easy work of donning and doffing the fin.
- Re-engineered footplate with new co-molded Grip Pads provides improved non-skid grip on wet surfaces.

SEAWING NOVA GORILLA

While identical in design to the Seawing Nova, the Gorilla uses a special additive in its compound to provide more stiffness and snap to its blade. This results in increased power and control for divers who prefer more feedback in their kicks. The stiffer blade also allows for more effective sculling, frog kicks and reverse kicks, making it an excellent choice for tech divers.

- Built with a space-age Monprene elastomer that is virtually indestructible. It includes a special additive to enhance stiffness and increase feedback.
- Proprietary G4 articulated joint allows the entire blade to pivot and generate thrust.
- Wing-shaped blade creates a near-perfect balance of stiffness and flex.
- Variable Blade Geometry wing tips arc upwards, providing more power and increasing stability.
- Pivot Control Technology ensures that the most efficient 45-degree angle of attack is maintained no matter how easy or hard you kick.
- Marine-grade bungee strap is self-adjusting, comfortable, extremely durable, and makes easy work of donning and doffing the fin.
- Re-engineered footplate with new co-molded Grip Pads provides improved non-skid grip on wet surfaces.

SEAWING NOVA FULL FOOT

Divers who prefer to dive without booties are going to love the Seawing Nova Full Foot. It offers all the power, acceleration, maneuverability and effortless kicking characteristics of the open-heel Seawing Nova, but with the foot support and comfort of a full foot design. You won't find a better performing or more comfortable full foot fin for cruising the wrecks and reefs of the tropics.

- Ergo-fit foot pocket is low profile to prevent chafing and blistering on the ankle and Achilles tendon.
- Extended toe box enhances comfort during extended bottom times.
- Power Rails under the extended footplate offer efficient power transfer.
- Built with a space-age Monprene elastomer that is virtually indestructible.
- Proprietary G4 articulated joint allows the entire blade to pivot and generate thrust.
- Wing-shaped blade creates a near-perfect balance of stiffness and flex.
- Variable Blade Geometry wing tips arc upwards, providing more power and increasing stability.
- Pivot Control Technology ensures that the most efficient 45-degree angle of attack is maintained no matter how easy or hard you kick.

JET FIN W/SPRING STRAP

The Jet Fin set the standard for power and durability when it was first introduced 50 years ago. Today, tech divers, deep divers, military divers, commercial divers and dive instructors, as well as old-school recreational divers, still strap on a pair of Jet Fins before hitting the water. This version comes with a rugged stainless-steel spring heel strap that lasts forever and makes donning and doffing as easy as can be.

- Rubber construction is known for its durability, promising a lifetime of use.
- Proven vented design decreases drag on the up stroke and enhances thrust on the down stroke.

JET FIN ADJUSTABLE

The classic Jet Fin offered with an adjustable heel strap. This famous fin, with its durable rubber construction and distinctively beefy shape, has been seen on dive boats, research vessels and in the world's most remote dive locales since 1965, and it's still the fin of choice among hosts of professional divers the world over.

- Rubber construction is known for its durability, promising a lifetime of use.
- Proven vented design decreases drag on the up stroke and enhances thrust on the down stroke.

TWIN JET MAX

Max out on propulsion with the Twin Jet Max. This high performance split fin delivers “propeller technology” with a slightly stiffer blade than what you might expect in a flexible split fin. Designed for divers who like more feedback in their kicks, with this fin you will enjoy solid propulsion and excellent maneuverability with minimum leg and ankle stress.

- Dual-compound design results in a stiffer blade that increases propulsion and optimizes maneuverability.
- Patented split fin propeller technology produces more propulsion with considerably less effort than traditional blades.
- Drag-reducing vents where foot pocket and blade meet radically decrease drag on both up and down strokes.
- Semi-rigid side rails improve stability through the kicking cycle.
- The foot pocket’s extended soleplate allows you to maximize the amount of energy you expend on each kick without wasting energy.
- Steel spring straps never need adjusting, making it even easier to don and doff the fin.

TWIN JET

You won't find a better provider of maximum propulsion with minimum kicking effort than the Twin Jet. The distinctive split hydrofoil shape allows water to flow between and around each of the twin blades that flex independently to produce propulsion in much the same manner as a propeller. These blades are also angled to provide symmetrical power on both up and down strokes, creating a smooth and stable kicking motion.

- Durable Monprene construction will last a lifetime of active diving.
- Patented split fin propeller technology produces lots of propulsion with minimal effort.
- Drag-reducing vents where foot pocket and blade meet radically decrease drag on both up and down strokes.
- Foot pocket's extended soleplate allows you to maximize the amount of energy you expend on each kick without wasting energy.
- Extra-wide foot pocket is ideal for drysuit or semi-dry suit boots as well as standard warm-water boots.
- Quick-connect swivel buckles allow for easy donning and doffing. Spring heel straps are optional.

TWIN JET FULL FOOT

When it comes to having fun while finning, the Twin Jet full foot leads the pack. This lively kicker offers all of the performance characteristics of the adjustable Twin Jet but with a comfortable full foot pocket for barefoot diving in warm water.

- Durable Monprene construction will last a lifetime of active diving.
- Patented split fin propeller technology produces lots of propulsion with minimal effort.
- Drag-reducing vents where foot pocket and blade meet radically decrease drag on both up and down strokes.
- Foot pocket's extended soleplate allows you to maximize the amount of energy you expend on each kick without wasting energy.

JET SPORT ADJUSTABLE

Lightweight and comfortable, fans of traditional blade fins will be impressed with the performance of the Jet Sport. With a big, slightly stiff blade and a soft rubber foot pocket, this fin generates propulsive kicking power, provides good stability and makes efficient work of frog and dolphin kicks. The fin is easy to maneuver too – responsive in turns and able to back you out of tight spots. It's the perfect blend of performance, kicking comfort and price.

- Three-material blade construction optimizes flex to maximize kicking performance.
- Drag reducing vents substantially decrease resistance on both up and down strokes.
- Big blade generates a powerful response in the water and improves stability and maneuverability.
- Ergonomic foot pocket molds to your foot for total comfort.
- Quick release buckles simplify strap adjustment and make donning and doffing easy.
- Effective non-skid pattern protects against slips on wet surfaces.
- Small sizing is good for smaller feet and young divers.

JET SPORT FULL FOOT

A full foot version of the powerful Jet Sport adjustable, this is a lightweight fin that delivers lots of propulsion, excellent maneuverability and feels comfortable on bare feet. It's an ideal choice for finning in the tropics.

- Three-material blade construction optimizes flex to maximize kicking performance.
- Drag reducing vents substantially decrease resistance on both up and down strokes.
- Big blade generates a powerful response in the water and improves stability and maneuverability.
- Ergonomic full foot pocket molds to your entire foot for total comfort during long dives.
- Effective non-skid pattern protects against slips on wet surfaces.
- Small sizing is good for smaller feet and young divers.

DIVE 'N ROLL

With a hard-shelled main compartment and a removable backpack, this two-in-one gear transport system takes the hassle out of traveling with dive gear. Separate the pieces for quick baggage stowage and carry-on convenience, then zip them together and you're ready to roll again. Couldn't be easier.

- One rigid case plus one removable soft bag equals a hassle-free gear transport system.
- Non-rigid portion of the exterior is made from a combination of 420D Nylon NT, 450D Rip-stop and 600D Polyester/PU for strength and durability.
- The large main compartment is protected by rigid sides and bottom, creating a gear carrier that's virtually indestructible.
- Coil double-slider zippers are durable and make accessing the large main compartment that much easier.
- Additional packing space in the main compartment's soft lid is ideal for stashing clothes and other soft goods.
- Detachable backpack enables you to keep your most valuable gear with you throughout your journey.
- Two rubber covered handles plus a telescopic tow handle and reinforced saltwater-resistant wheels offer a bevy of lifting, carrying and rolling options.
- Dimensions: 28x18x17in/72x46x44. Weight: 12lbs/5.4kg. Volume: 33gal/146L.

PORTER BAG

This big carrier offers lots of volume to handle your gear. It comes with reinforced "off-road" skate-style roller wheels plus a backpack system, so you'll be able to easily roll or carry the bag wherever you want to go. But what's really great about the Porter Bag is its easy-fold feature that allows it to stow compactly as it awaits your next dive adventure.

- Bag's exterior is made from a combination of 420D Nylon NT and 450D Rip-stop for strength and durability. The interior lining is 150D Polyester.
- The bag enjoys a 20% lighter overall weight thanks to the new PU lining.
- Offering lots of gear carrying capacity, the bag folds into a compact package for storage.
- Large main compartment, two front pockets and two inside pockets provide a variety of packing and stowage options.
- YKK saltwater-resistant double-slider zipper is durable and makes accessing the large main compartment that much easier.
- Backpack system plus top handle with reinforced "off-road" skate-style wheels provide multiple transport options.
- Adjustable top handle makes rolling easy and convenient.
- Dimensions: 34x22x14in/85x55x35cm. Weight: 5.6lbs/2.5kg. Volume: 37gal/164L.
- Folded dimensions: 20x16x7in/51x41x18cm.

CARAVAN BAG

The Caravan will cart your dive gear safely and conveniently, no matter where in the world you do your diving. As a roller bag it works great moving gear from car trunk to local dive boat, but it can just as easily negotiate crowded airports as you journey to exotic dive destinations. Easy to lift, carry and roll, the Caravan is a solid all-round choice for hassle-free gear transport.

- Bag's exterior is made from a combination of 420D Nylon NT and 450D Rip-stop for strength and durability. The interior lining is 150D Polyester.
- The bag enjoys a 20% lighter overall weight thanks to the new PU lining and updated construction.
- Offering over four gallons more volume than its predecessor, the Caravan comes with substantially increased gear-packing capacity.
- A large main compartment with U-shaped opening, two side pockets and one flat pocket on top provide a variety of packing and stowage options.
- YKK saltwater-resistant double-slider zippers are durable and allow for easy access of the large main compartment.
- External compression straps help snug down a partial load to make bag handling easier.
- Telescopic double-bar tow handle, side, top and bottom carry handles and reinforced saltwater resistant wheels provide a bevy of lifting, carrying and rolling options.
- Dimensions: 28x16x14in/85x55x35cm. Weight: 8.6lbs/3900g. Volume: 22gal/98L.

DRY BAGS

You won't find more versatile waterproof bags than these dry duffels. Made of 840D super-heavy-duty PVC (Tarpaulin) fabric with taped seams and a waterproof zipper, their large main compartments offer lots of cargo-carrying capacity. U-shaped openings with YKK double sliders guarantee easy access. Two or three internal Velcro pockets are provided for stowing smaller items. Each bag includes two carry handle straps that can be converted into a backpack system. A built-in plug (except on the 25L) is provided for draining and cleaning. Available in three sizes for all your gear-hauling needs.

MESH 'N ROLL

The Mesh 'N Roll takes the mesh bag concept to a new level by adding a top handle and heavy-duty off-road style wheels, so now you can roll your gear down to the dive site. Even better, when the diving's done, you can tow your soggy gear behind you rather than letting it drench your backside as you lug it back to your car or hotel room. The bag features a unique packing system to keep it small in your checked bag.

- Heavy-duty PVC coated mesh fabric is rugged yet lightweight.
- Large main compartment is water-draining and holds lots of dive gear.
- YKK double slider U-shaped zipper is saltwater-resistant and allows ample access to the bag for packing and unpacking.
- Separate non-mesh zippered pocket is perfect for storing smaller valuables.
- Top pull handle and heavy-duty wheels create an easy-to-manuever gear transport system.
- Semi-rigid base with reinforced corners protect the bag when rolling over rough terrain.
- Adjustable straps can be used for shoulder or backpack-style carrying.
- Dimensions: 31x15x-14in/78x38x-35cm. Weight: 5.7lbs/2600g. Volume: 23.6gal/104L.

MAKO

The ultimate compact dive knife, the Mako offers a multi-function blade that includes a serrated edge, a conventional edge, a line-cutting notch and a bottle opener. The Tanto tip, with its angled shape, is one of the strongest knife points available and, combined with the different blade edges, makes the Mako an excellent general-purpose dive knife. Offered in 304-grade hard-tempered stainless steel to resist surface oxidation or in hardened titanium for excellent corrosion-free cutting performance.

- Compact knife is 7.5in/19.7cm long overall with a 3.5in/8.5cm blade.
- Knife handle offers plenty of grip-ping area as well as thumb guards to keep the knife from slipping.
- Locking sheath features a convenient one-hand release mechanism.
- Kit for mounting knife onto a BC or a hose is included.

WHITE TIP

The 304-grade hard-tempered stainless steel blade is 2.56in/6.6cm long and provides an excellent cutting edge and good resistance to surface oxidation. This is the perfect compact knife to attach to a hose or your BC as a primary knife, or stow in an easy-to-reach pocket as a back-up tool. Includes a locking sheath and kit for BC/hose attachment.

PRICES

MSRP	64.00
------	-------

Part Number	Description
32.002.000	Steel Knife

- Overall length of 5.8in/14.7cm is compact enough to fit just about anywhere, and weighs only 2oz/57g.
- Length of knife blade: 2.56in/6.6cm.

X-CUT

This lightweight, multi-function knife is made from alpha (hardened) titanium. Measuring just over five inches in overall length, its 2.5-inch blade offers both serrated and smooth cutting edges, along with a line cutter. The blade is specially designed and shaped to maintain a highly-durable cutting edge for a long life of corrosion-free performance.

- No-nonsense handle is contoured and offers indents and a finger guard for a firm, non-slip grip when bearing down on serious cutting jobs.
- Low profile, soft protective sheath features a Velcro closure and is designed specifically to fit on a tech harness waistband.
- Eyelet is provided for running a safety lanyard.

MESH CUTTER

This multi-purpose cutting tool is designed to be used with a pulling rather than pushing motion; this provides much better leverage, more cutting power, and improves safety.

- The 3in/7.5cm hook-shaped stainless steel blade is perfect for slicing through line and netting.
- Tool comes with an eyelet for running a security lanyard.
- A contoured shackle key is provided for boat divers.
- Polyester sheath is included.

NOVALIGHT 720

The Novalight 720 delivers brilliant illumination to light up the dark spaces and bring out the vibrant colors on night dives as well as day dives. Measuring 9.1 in/232mm in length, it is machined from heavy-duty aluminum so is both lightweight and built to last. It's also easy to use and provides lots of burn time. A 50 percent mode allows you to increase burn time if you don't need the full power. For divers looking to brighten their dives, the Novalight 720 can't be beat.

- Rugged gun-metal aluminum body offers a stealthy “tech” look while providing lightweight long-term durability.
- Interchangeable light head.
- NEW -- Equipped with the newest Cree XPL LED.
- NEW – 13,800lux@1m.
- NEW – Two modes: 100% and 50% power.
- 720 lumens ranks among the best in its class in illumination.
- Double O-ring seals ensure watertight integrity.
- Diamond-shaped knurling on both handle and light head guarantees a firm grip, with or without gloves.
- Easy twist on/twist off activation allows for trouble-free operation, regardless of depth.
- Shock-proof rubber protection keeps the light head safe from knocks and bumps.
- Over-pressure valve releases battery off-gassing – a safety feature not normally found on dive lights at this price point.
- A depth rating of 1000ft/300m ensures worry-free lighting in virtually all diving conditions.
- Powered by three C-cell batteries (not included) that provide up to 10 hours of burn time.

MSRP	162.00

Part Number	Description
30.221.000	720 Lumen Light

NOVALIGHT 720 WIDE

Measuring 8.3 in/210mm, this new dive light comes with the same rugged construction, the same 50 percent mode and the same list of features as the standard Novalight 720. What sets it apart is its wider beam of approximately 80 degrees, making it the perfect primary night diving light. It comes equipped with a Cree XML U2 LED. Batteries not included.

PRICES	
MSRP	162.00

Part Number	Description
30.221.250	Wide Beam 720 Lumen Light

NOVALIGHT 720R

Measuring only 5.9 in/150 mm in length, the rechargeable Novalight 720R is more compact than the Novalight 720 yet offers the same rugged aluminum construction and delivers the same high-intensity 720-lumen illumination. A 50 percent mode allows you to increase burn time if you don't need the full power. For divers who want a durable light they can stow in a BC pocket, offers maximum light intensity throughout an entire day or night of diving and recharges quickly and easily, the Novalight 720R is the ideal choice.

- Same features as the Novalight 720 but with a smaller gun-metal aluminum body for lightweight durability.
- Interchangeable light head.
- NEW -- Equipped with the newest Cree XPL LED.
- NEW - 13,800lux@1m.
- NEW - Two modes: 100% and 50% power.
- 720 lumens ranks among the best in its class in illumination.
- Double O-ring seals ensure watertight integrity.
- Diamond-shaped knurling on both handle and light head guarantees a firm grip, with or without gloves.
- Easy twist on/twist off activation allows for trouble-free operation, regardless of depth.
- Shock-proof rubber protection keeps the light head safe from knocks and bumps.
- Over-pressure valve releases battery off-gassing - a safety feature not normally found on dive lights at this price point.
- A depth rating of 1000ft/300m ensures worry-free lighting in virtually all diving conditions.
- Powered by a single 18650 Lithium-ion rechargeable battery (not included) that provides up to 2.5 hours of burn time.

30.221.350

NOVALIGHT 220

With a length of just 3.7 in/95 mm the Novalight 220 is an extremely useful secondary light that can be stored in the smallest BC pocket. It offers three modes: 100 percent power, 25 percent power and Flash, plus is equipped with an over-pressure valve to release battery off-gassing, making it the safest mini-light on the market. Delivering 220 lumens of illumination, the Novalight 220's battery features a shelf life of up to 10 years so you don't have to worry about it if it stays in your BC pocket over the winter.

- Rugged gun-metal aluminum body offers a stealthy "tech" look.
- With a length of just 3.7 in/95 mm it is an incredibly useful secondary light.
- Equipped with one Cree XPG LED.
- 2.700lux@1m.
- 220 lumen illumination.
- Powered by one CR123 battery (not included).
- Over-pressure valve releases battery off-gassing - a safety feature not normally found on dive lights of this size.
- A depth rating of 394ft/120m ensures worry-free lighting in virtually all diving conditions.

NOVA 200

With the Nova 200 you get powerful illumination in a compact package. Featuring a lightweight aluminum casing that's easy to grip, this light comes with a powerful LED that pumps out 200 lumens of high intensity illumination, just what you need to light up any underwater scene. As a backup light, a travel light, or an all-purpose daytime light, nothing shines like the Nova 200.

- Rugged black aluminum body is rugged and durable to stand up to years of diving.
- Three AAA alkaline batteries (not included) deliver 3.5 hours of illumination.
- Adjustable wrist lanyard provides a no-drop system when exploring the depths.
- Compact size stows easily in most BC pockets.

ELEMENT 2PC FREEDIVING, 3MM

The Element freediving is a two-piece 3mm wetsuit with high-waist pants and a hooded beavertail vest. The suit uses no zippers to minimize water seepage, and the beavertail is adjustable. Easy to don and doff and extremely comfortable, the high-stretch neoprene offers lots of freedom of movement.

- Made from a non-allergenic and non-toxic X-Foam neoprene formula that complies with the very strict P.A.H. (Polycyclic Aromatic Hydrocarbons) test requirements.
- “Sharkskin” textured neoprene is durable, high-stretch and virtually eliminates hydro-drag.
- Thicker neoprene in the torso area increases thermal protection, while thinner neoprene in the arms and legs improves mobility.
- Smooth-skin face seal on the attached hood virtually eliminates water seepage, allowing you to maintain maximum body heat.

S1

The S1 is a super powerful freediving fin made with a 99% carbon blade for exceptional power recovery and unparalleled performance. It is part of a line of carbon freediving fins developed and tested in partnership with Trygons, renowned for its progressive design, materials and manufacturing methods, as well as its association with world-record-setting Freedivers.

- Carbon blades are known to provide the highest performance in freediving fins.
- Hydrodynamic, optimized foot pocket is not only ultra-soft and comfortable, it also lessens drag.
- Rigid but comfortable proprietary foot pocket delivers the best possible power transmission between foot and blade.
- Unique low-profile support rails reduce turbulence and drag forces and enhance the carbon blade's high performance characteristics.
- Soft rails plus construction technique enable 100% of the fin's power to come from blade action.

S2

Built with a carbon layer over a fiberglass core, the S2 delivers bend and kicking performance comparable to the full-carbon S1, but at a value price. Like the S1, the foot pocket of the S2 is made of soft no-stretch rubber to eliminate turbulence.

- Blade features a blend of carbon fiber and fiberglass layers.
- Hydrodynamic, optimized foot pocket is not only ultra-soft and comfortable, it also lessens drag.
- Rigid but comfortable proprietary foot pocket delivers the best possible power transmission between foot and blade.
- Unique low-profile support rails reduce turbulence and drag forces and enhance the carbon blade's high performance characteristics.
- Soft rails plus construction technique enable 100% of the fin's power to come from blade action.

S3

The perfect fin choice for freedivers just getting started in the sport, the S3 offers a long, soft blade made of a high performance plastic compound. It can generate a lot of power and speed while maintaining excellent energy efficiency. Made with the same hydrodynamic foot pocket used on the S1 and S2, this fin is extremely durable and quite affordable.

- Hydrodynamic, optimized foot pocket is not only ultra-soft and comfortable, it also lessens drag.
- Unique low-profile guide rail promotes perfect water channeling.
- Soft rails plus construction technique enable 100% of the fin's power to come from blade action.

FREEDIVING BAG

This padded backpack is the perfect way to carry and protect delicate freediving carbon and carbon fiber fins. The internal neoprene pouch protects fins while the outer Tarpaulin fabric absorbs the wear and tear of transport and travel hazards. Double outside pockets provide easy-access storage for accessories and personal items.

- Made of 840D SU-PER-heavy-duty PVC (Tarpaulin) fabric with taped seams and a waterproof zipper.
- U-shaped opening with YKK double sliders guarantees easy access.
- Carry handle and backpack straps make easy work of hands-free carrying.
- Dimensions: 37x10x-6in/94x26x16cm. Weight: .9lb/400g. Volume: 8.9gal/39L.
- Will accommodate S1, S2 and S3 fins.

STEEL PRO

The single-lens, low-volume Steel Pro offers an expansive view of the underwater world. Perfect for freediving or scuba diving, the frameless design is streamlined and lightweight, and the soft silicone skirt provides a comfortable, watertight fit on a range of face shapes. The black and white skirts are very effective at blocking out light reflection at depth, and the low volume design makes it a great mask for all types of diving.

- Ultra low-volume design requires minimal air when equalizing, a huge plus for freedivers.
- Premium super-soft silicone skirt seals out water and comfortably fits a range of faces.
- Ultra Clear scratch-resistant glass lens delivers undistorted vision and long-term wear.
- Easy-adjust rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.

24.109.900

STEEL COMP

The ultimate freediving mask, the frameless, dual-lens Steel Comp is particularly well-suited to deep divers. It has the lowest possible internal volume so equalizing is easy. Plus, on descent the mask itself compresses, so equalization is not required as often. The soft skirt and buckle system allow for a comfortable, watertight fit on most faces.

- Dual-lens frameless design offers the lowest possible internal volume, plus it compresses on descent, an advantage during deep freediving descents.
 - Flat, Ultra Clear, scratch-resistant glass guarantees an undistorted view of the underwater world.
 - Premium supple silicone comfortably fits a range of faces.
 - Rotating buckles work with a micro-adjustable strap to achieve a comfortable, watertight fit.
- Note: with the Steel Comp, as water pressure increases the bridge between the lenses bends slightly and squeezes the mask tighter to the face. The only noticeable indication of this is a brief change in vision as the eyes need a split second to adjust. However, because of this the Steel Comp is not recommended for scuba diving.

REBEL

Specially designed for younger divers, the front-adjustable Rebel is built tough to last. Its wrap-around bladder provides a stable and secure ride at depth, and the padded backpack and cummerbund offer a lot of additional comfort. Three dump valves and optional weight integration add to its ease of use. The one-size-fits-all is aided by a choice of cummerbunds to help dial in a snug fit.

- Constructed of 420 denier nylon for lightweight durability.
- Optional gravity release weight pouches eliminate the need for a weight belt.
- Padded backpack provides extra cushion when strapped to a tank.
- Adaptable sternum strap and cummerbund allow for a comfortable fit.
- Standard web strap with lightweight buckle holds the tank secure.
- Balanced inflator and three dump valves allow for pinpoint buoyancy control.
- Two zippered cargo pockets and three plastic D-rings provide lots of opportunities for carrying extra gear.

REBEL STEAMER, 2.5MM

This well-cut steamer is offered in a 2.5mm thickness for maximum comfort and protection when diving in warm waters. The soft neoprene is made from X-Foam, a neoprene formulation that is non-toxic. It's the only neoprene formulation that complies with the very strict P.A.H. (Polycyclic Aromatic Hydrocarbons) test requirements.

- Diagonal back zipper and long ankle zippers make the suit extremely easy to don and doff.
- Plush torso interior is comfortable and contributes to overall thermal protection.
- Thinner-skin neoprene on wrists can be rolled up or down depending on arm length.
- Short zipper at the neck enhances comfort during surface intervals.
- Stretch neoprene side panels increase range of motion.
- Reinforced kneepads protect the legs of both suit and diver when kneeling on the bottom.

REBEL SHORTY, 2MM

Kids will enjoy wearing this shorty with its cool, modern design. It provides comfort and warmth under water and good sun protection for snorkeling and surface swimming. The sophisticated cut creates a comfortable fit that leaves no pressure marks. The soft neoprene is made from X-Foam, a neoprene formulation that is non-toxic and complies with the very strict P.A.H. (Polycyclic Aromatic Hydrocarbons) test requirements.

- Stretch binding at neck, arms and legs makes it comfortable to wear, helps keep water out and warmth in.
- Nylon 2 Sides construction for overall comfort.
- Diagonal back zipper is comfortable and makes it easy to get in and out of the suit.

Gear Designed Specifically for Children Makes Diving More Fun

That's why SCUBAPRO offers a full line of kids snorkeling and diving gear specially designed to address the unique fit and performance needs of children so they can be safe and comfortable while they have fun in the water.

However, many SCUBAPRO masks, fins and even some wetsuits and rash guards found in other sections of this guide also make excellent options for kids due to their smaller sizing.

Here are just a few examples:

Fins:

[Rubber Full Foots](#)

Masks:

[Steel Pro, Hydros, Scout, Mini Frameless, Spectra Mini and Sub Vu Mini](#)

Snorkels:

[Curve, Apnea](#)

Wetsuits:

[Definition 2.5mm Shorty, All Everflex products, and the 0.5 Profile](#)

Boots:

[Delta Boots](#)

Rash guards:

[Everflex, Long Sleeve Fleece](#)

CRUISER ADULT VEST

The secret to enjoying safe and stress-free snorkeling is being comfortable on the surface. The Cruiser snorkeling vest is constructed of durable nylon and stretchable neoprene to provide maximum comfort and a snug fit. The inflatable front bladder provides extra buoyancy for comfort while snorkeling. It's offered in high-visibility yellow for surface safety and includes a security pocket for stowing accessories.

TRINIDAD ADULT MASK

This high-quality mask is a favorite among snorkelers and divers alike. The Trinidad's frameless single-lens design lets you enjoy an expansive view of the underwater world. Because it is low profile, clearing the mask and equalizing is easy. A soft premium silicone skirt and a quick-release strap create a snug-fitting, comfortable mask that's easy to use.

- Tempered glass single lens styling for uninterrupted vision.
- Extremely low volume makes it easy to clear.
- New one-hand, quick-adjust buckle system makes fine-tuning fit a breeze.
- Soft silicone skirt is comfortable and provides a watertight seal.

ESCAPE

The splashguard barrel-top design of the Escape helps keep water from entering the large-bore barrel while allowing abundant airflow. Included is a very efficient purge valve located down low, an ultra-comfortable regulator-style mouthpiece and a convenient clip for easy removal.

- Splashguard top design helps keep water from entering the large-bore barrel.
- Flexible, corrugated section is easy to use and drops away from face when not needed.
- Ergonomic mouthpiece enhances comfort during extended swims.
- Purge valve positioned at the lowest point requires only a quick breath to clear any errant water.
- Quick-connect clip makes it easy to attach or remove snorkel from mask strap.

TRINIDAD COMBO

You can't go wrong with this snorkeling combo. The frameless single-lens Trinidad mask offers an expansive view of the underwater world. The Trinidad snorkel is an easy breather.

- The mask is low-volume so clearing and equalizing is easy.
- Soft silicone mask skirt and quick-adjust strap create a comfortable fit.
- Snorkel features a splashguard top to keep water out.
- Lower purge expels any water that manages to sneak in.
- Premium silicone mouthpiece fits comfortably in the mouth.
- Flex section and quick-connect clip make it easy to attach to the mask strap and even easier to use.
